ANNUAL REPORT  
OF THE  
BOARD OF TRUSTEES  
OF THE  
GEORGIA STATE SANITARIUM

For the Year Ending September 1st, 1900,

---

*To His Excellency, Allen D. Candler,  
Governor of Georgia:*

As required by law the Board of Trustees of the Georgia State Sanitarium beg to submit Annual Report for fiscal year commencing September 1st, 1899, and ending September 1st, 1900. We present herewith Annual Reports of the heads of departments of this institution, which reports have been adopted as parts of the Annual Report of your Board of Trustees, as they fully set forth the details of these several departments of the Sanitarium.

Your Board of Trustees are pleased to be able to report that the per capita cost of the Sanitarium for the fiscal year ending September 1st, 1900, is, so far as we are informed, the lowest in the history of the institution.

The following tabular statement shows the per capita cost of the institution each year for 28 years, *i. e.* 1873 to 1900 inclusive:

Table showing average number of patients in this institution, the per capita per diem, and the per capita per annum, from 1873 to 1900, inclusive:

<i>Year.</i>	<i>Number of Patients.</i>	<i>Per Diem.</i>	<i>Per Annum.</i>
1873.....	550 .....	52 1-2 .....	\$190 70
1874.....	550 .....	48 1-2 .....	177 36
1875.....	600 .....	37 1-2 .....	136 80
1876.....	600 .....	37 3-4 .....	137 77
1877.....	638 .....	36 63-100 .....	133 70
1878.....	725 .....	34 55-100 .....	126 11
1879.....	748 .....	32 9-10 .....	120 10
1880.....	820 .....	35 64-100 .....	130 09
1881.....	886 .....	33 9-10 .....	123 74
1882.....	942 .....	38 5-8 .....	140 98
1883.....	1005 .....	33 3-10 .....	121 46
1884.....	1179 .....	34 3-4 .....	126 90
1885.....	1232 .....	34 18-100 .....	124 76
1886.....	1237 .....	33 1-2 .....	123 19
1887.....	1266 .....	34 12-100 .....	127 40
1888.....	1340 .....	34 83-100 .....	127 48
1889.....	1438 .....	34 74-100 .....	126 81
1890.....	1538 .....	31 43-100 .....	114 72
1891.....	1616 .....	32 8-100 .....	117 09
1892.....	1618 .....	32 33-100 .....	118 33
1893.....	1623 .....	31 95-100 .....	116 62
1894.....	1709 .....	32 42-100 .....	118 60
1895.....	1783 .....	32 .....	116 80
1896.....	1912 .....	32 42-100 .....	118 33
1897.....	2085 .....	33 11-100 .....	120 85
1898.....	2247 .....	32 43-100 .....	118 50
1899.....	2383 .....	32 5-100 .....	117 00
1900.....	2495 .....	29 86-100 .....	108 99

This gratifying financial exhibit resulted from the careful and prudent management of the Sanitarium by your Board of Trustees, with the able assistance of Superintendent Powell and the heads of departments serving under him. We would especially emphasize the fact that this remarkably economical management did not result from false economy in any department of the institution, for an examination of its every department will disclose the fact that it has been maintained on a par with the best condition of the Sanitarium at any time within its history. In July last, your Excellency did the Board of Trustees the honor of

meeting with us, and carefully examining the various departments of the Sanitarium, and we feel assured that you will confirm our statement as to the excellent condition in which all departments of this great charity is maintained.

#### HEALTH.

We are highly gratified to be able to report that during the year no epidemic disease invaded the Sanitarium except influenza, which prevailed in some of the wards. We are especially pleased to report that notwithstanding the fact that smallpox prevailed in many counties in Georgia no case of the dread disease invaded the Sanitarium. In April last smallpox appeared in Milledgeville, and would almost certainly have been brought into this institution but for the fact that your Board of Trustees instituted a rigid military quarantine against Milledgeville before the disease was officially declared to be in existence in that city. The Board of Trustees on January 20th, 1898, appreciating the danger of importing smallpox into our population, enacted the following rule:

"Resolved, That no patient, white or colored, will be received from any county where smallpox exists, and if any patients be sent to the institution in violation of the above resolution they shall be returned at the expense of said county."

This rule has been faithfully enforced by the present Board of Trustees. It seems, at first sight, to be a harsh measure, but we feel that our first and paramount duty is to zealously guard the health of the unfortunate inmates of this institution, and we shall in future feel constrained to enforce this rule to the letter.

#### RECOVERIES OF PATIENTS.

By reference to Superintendent Powell's report you will find that during the year 49¾ per cent of the cases of acute insane committed to this institution were discharged as cured or recovered. The best insane hospitals can show no better record than that of our Sanitarium for the year end-

ing September 1st, 1900. This large percentage of recoveries speaks volumes for the necessity of sending such patients to hospital immediately that they develop insanity.

We invite the special attention of citizens of Georgia to Superintendent Powell's presentation of this matter.

#### \* CONVICT INSANE.

We heartily endorse Superintendent Powell's suggestion relative to the convict insane, and looking to securing the result suggested by him, we respectfully urge that the Sanitarium Committee of the General Assembly at its next session hold a joint conference composed of that committee, the Prison Commissioners and the Trustees of the Georgia State Sanitarium, with the view to formulate a plan to carry Superintendent Powell's suggestion into effect. We invite the especial attention of your Excellency to this subject, and respectfully request that in your forthcoming message to the General Assembly you will devote a section to this subject.

#### NECESSITY FOR ENLARGEMENT.

Your Board of Trustees are constrained to urge upon the General Assembly the necessity for providing at the approaching session for prompt and generous enlargement of the Sanitarium. The records of the Sanitarium show that we now have 2,551 inmates, and applications on file for reception of two hundred insane patients who cannot be received because of the fact that the institution is already overcrowded to an unwarrantable and dangerous extent. Many of these 200 citizens of our commonwealth are confined in jails and poor houses awaiting admission to the institution as vacancies occur by reason of recoveries and deaths among the inmates. The necessity for receiving acute, curable and dangerous cases became so urgent that your Board of Trustees were forced in August to direct Superintendent Powell to select 100 of the incurable and least dangerous cases from among the inmates, and return them

MAIN BUILDING.

to their respective counties during the month of September. The Board acted under the following authority:

Code of Georgia. Section 1416 (1344 a):

*"Harmless Lunatics Discharged:* The Board of Trustees of the Lunatic Asylum shall have power, upon the certifying thereunto of the medical officer of the institution, to discharge or remand to the county authorities whose duty it is made by law to provide for the paupers of the county from which he or she was sent, a patient in said asylum, whose condition is such that no probability exists of his or her restoration to full reason and sanity by medical ministration thereto, and who at the same time is regarded harmless and inoffensive in spirit, and whose remission to social life would reasonably involve no danger to the life of those with whom he or she would be associated."

Your Board were pained to be forced to resort to this measure, and only resorted to it because duty to acute, curable and dangerous cases outside of our institution urgently demanded it. The measure grates upon our feelings. It is harsh in the extreme, and the great state of Georgia should not allow this stigma to remain upon her escutcheon. Certainly it is the duty of Georgia to provide hospital care of this unfortunate, helpless and but too often forsaken class of our citizens. While the law quoted designates harmless, incurable insane, we wish to put ourselves upon record as protesting that no one of these cases can be considered harmless. Each one of them is a powder magazine likely to explode at any moment and murder or burn as their insane impulses may suggest. The discharge of this class of patients is but a temporary expedient for sooner or later all of them must be returned to this institution for the reason that not one county in our state is properly equipped for just and humane care of insane persons. If returned to their homes these insane persons are a constant menace to their to their families; if committed to poor houses they will suffer from cruelty and wrongs incident to lack of experienced supervision and control. The respective counties support the state, and in turn the state should take upon herself the

care of all insane persons in her borders, and maintain them in the state insane hospital, where they can be tenderly nursed and cared for, and receive the benefit of expert medical care. If we speak strongly on this subject it is because our familiarity with this unfortunate class of citizens places us in position to know their special needs. Duty to the insane of our state demands of us to insist that we are unwilling to have this burden of responsibility rest on our shoulders. We truthfully set forth the needs of these helpless, forsaken people, and the responsibility for longer continuance of this deplorable state of affairs must in future rest upon the General Assembly of Georgia. After due examination into the matter, your Board of Trustees have decided (and Superintendent Powell concurs in the opinion) that it is necessary to construct one large building capable of caring for nine hundred inmates.

The following report of our Committee on Buildings is heartily approved:

Your Committee on enlargement of buildings beg to make the following report:

We have carefully inspected the present buildings to determine the practicability of enlargement of same by building annexes. After a careful survey we are of the opinion that it would be both impracticable and unwise to enlarge any of the present buildings. We therefore recommend the erection of a separate building with a capacity to meet the demands.

Respectfully submitted,

J. S. MONTGOMERY, Chairman.

We therefore urgently request a special appropriation of one hundred and fifty thousand dollars for this purpose. We remind the Legislature that fully 18 months must necessarily elapse between the time the money is appropriated and the completion of the building.

How necessary then that the incoming Legislature should promptly provide the ways and means for this urgent, indispensable enlargement of the Sanitarium. We submit

that not only is this enlargement a necessity in order to receive the two hundred insane persons seeking admission into the Sanitarium through their legal guardians, but the necessity to relieve the dangerous overcrowding of our present population is as urgent as the need of increased accommodation in order to receive those outside of our institution. We direct the attention of the Legislature to Supt. Powell's remarks on the necessity for enlargement.

#### VISITS TO OTHER ASYLUMS BY TRUSTEES.

Your Board of Trustees have revived the policy of sending one of their members to examine and report on condition and management of other asylums, with the view of comparing their management with that of our Sanitarium. Vice-President Nisbet discharged this duty at the request of your Board, he being allowed traveling expenses. The able and interesting report of Trustee Nisbet is appended to this report, and we invite public attention thereto.

#### TRAINING SCHOOL FOR NURSES.

We are gratified to report the continued success and improvement of the Training School for Nurses begun five years ago in this institution. It has been and is the aim of the management of the Sanitarium to train up the nurses therein to the highest possible state of proficiency in order that humane and skilled nursing of patients may be assured.

#### APPROPRIATION FOR SUPPORT AND MAINTENANCE.

By reason of increased and increasing number of inmates of the Sanitarium we are constrained to ask an appropriation of \$290,000.00 for support and maintenance for the year 1901, and a similar amount for 1902. This amount is necessary not only because of increased population, having increased from 2247 in 1898 to 2495 in 1900, but on account of the great age of many of our buildings, the varying prices of commodities, and contingencies which cannot be foreseen but which must be met. In asking this amount for the

years 1901 and 1902 we do so with the distinct understanding that we will spend only so much thereof as may be needed to operate the Sanitarium in a wise and economical manner.

### SURPLUS.

We respectfully suggest that while the financial sheet of our Sanitarium shows that our surplus fund has been increased \$3,072.44 during the year just closed, this increased surplus will be exhausted in building operating room and other needed additions to the institution in order to bring it up to the requirements of a modern insane hospital. In asking an appropriation of \$290,000 for each of the two years 1901 and 1902, this is exclusive of the surplus fund on hand. This surplus must ever be kept to tide over the expensive fall and winter seasons, and which, if abolished, would render it impossible to meet our fall and winter expenditures.

The report of the Steward will fully acquaint you with the itemized expenditures in the various departments of the Sanitarium.

Upon the dairy, hog raising and farming interests of the Sanitarium, we refer you to the detailed report of the Assistant Steward. Assistant Steward Hollinshead's report shows that the net profits arising from these interests amounted to \$11,830.24 for the year.

The work in the Department of Pathology is fully set forth in the report of the Pathologist.

Engineer DeSaussure's report will acquaint you with the work of construction and repairs for the year just closed.

The reports of the Matron, Apothecary, Chaplain, Storekeeper and Treasurer will present in detail the affairs in each of these departments.

### TREASURER'S BOND.

The present law fixes the bond of Treasurer of Sanitarium at \$20,000.

The Treasurer frequently has in his hands money in excess of his bond.

We respectfully recommend the Treasurer's bond be fixed by law at \$40,000.

Your Board of Trustees take great pleasure in commending the corps of officials serving this institution. Much of the credit for efficient and economical management of the Sanitarium rests with Superintendent Powell and the officers serving under him, and your Board avails of this opportunity to extend thanks therefor.

To your Excellency and the members of the General Assembly we extend acknowledgments for official courtesy and generous provision for support of the Georgia State Sanitarium.

Respectfully submitted,

EUGENE FOSTER, M. D., President.

R. B. NISBET, M. D., Vice-President.

MOSES W. HARRIS, Secretary.

*Board Trustees Georgia State Sanitarium.*

## REPORT OF SUPERINTENDENT POWELL.

Georgia State Sanitarium, Sept. 1st, 1900.

To the Honorable Board of Trustees,  
Georgia State Sanitarium.

Gentlemen:—In obedience to the requirements of the law and rules of the institution, I herewith submit for your consideration the annual report of this institution beginning September 1st, 1899, and ending September 1st, 1900, with reports of Steward, Treasurer and other officers, which you will find hereto appended; a full and complete history of the operations of the Sanitarium for the past twelve months; giving, I hope, all the necessary statistical information in regard to the movements of both white and colored population. Also an itemized statement of expenditures, and for what purpose; showing in detail the amount of provisions, clothing, bedding, drugs, etc., purchased, from whom, price paid, and aggregate cost. Also balance of money appropriated for support and maintenance now in the hands of Sanitarium Treasurer, together with such suggestions as I think advisable in the management of the affairs of the institution.

On September 1st, 1899, there were white patients on hand 1,697, and colored 743, making a total of 2,440. There have been received since 454 whites and 245 colored, making a total reception of 699.

There have been discharged, removed, eloped and died during the year 588, leaving on hand September 1st, 1900, 2,551, of whom there are 62 whites and 3 colored on furlough, not discharged. There were four colored females and one white female brought to the institution in a pregnant condition during the year; all of whom were returned home until after confinement.

The average number of patients under treatment during the year was 2,495, while the total number receiving treatment was 3,139.

It will be seen that the average number receiving treatment was 112 more than last year. We have 111 more patients on hand than at the close of the last year.

The following tables will give in detail the movement of both white and colored population:

STATEMENT—WHITE.

In relation to the number of white patients during the past year, or from September 1st, 1899, to September 1st, 1900.

There were patients on hand September 1st, 1899 . . . . .	1,697
White Male Lunatics . . . . .	685
White Male Epileptics . . . . .	99
White Male Idiots . . . . .	42—826
White Female Lunatics . . . . .	772
White Female Epileptics . . . . .	64
White Female Idiots . . . . .	35—871—1,697

There have been received during the year:

White Males . . . . .	235
White Females . . . . .	219
	<hr/> 454

Total number of whites under treatment . . . . . 2,151

Of whom there have been

Discharged restored . . . . .	251
Discharged not insane . . . . .	2
Discharged eloped . . . . .	4
Discharged removed . . . . .	6
Discharged improved . . . . .	8
Discharged pregnant (when brought to the institution) . . . . .	1
Eloped improved . . . . .	1—273
There have died—White Males . . . . .	65
White Females . . . . .	61—126—
	<hr/> 399

Leaving on hand September 1st, 1900 . . . . . 1,752

CLASSIFICATION OF THE WHITES.

White Male Lunatics . . . . .	696
White Male Epileptics . . . . .	99
White Male Idiots . . . . .	40—696
White Female Lunatics . . . . .	822
White Female Epileptics . . . . .	62
White Female Idiots . . . . .	33—917—1,752

Of the white males there have died from asthenia 19, organic brain disease 9, apoplexy 4, marasmus 5, epileptic shock 10, organic heart disease 3, typhoid fever 1, acute enteritis 1, cerebral softening 2, carcinoma 1, paresis 2, enteritis 2, chronic

nephritis 1, anaemia 1, senile exhaustion 1, pulmonary congestion 1, suicide 1, and cerebral congestion 1. Total 65.

Of the white females, organic heart disease 5, enteritis 2, epileptic shock 5, tuberculosis 8, senile exhaustion 3, asthenia 17, pulmonary oedema 1, thoracic abscess 1, peritonitis 1, apoplexy 3, acute nephritis 5, broncho-pneumonia 1, influenza 1, chronic enteritis 2, carcinoma 2, erysipelas 1, enteric ulcer 1, organic brain disease 1, and continued fever 1. Total 61.

#### STATEMENT—COLORED.

In relation to the number of colored patients during the past year, or from September 1st, 1899, to September 1st, 1900.

There were patients on hand September 1st, 1899 . . . . . 743

Colored Male Lunatics . . . . . 305

Colored Male Epileptics . . . . . 70

Colored Male Idiots . . . . . 2—377

Colored Female Lunatics . . . . . 342

Colored Female Epileptics . . . . . 22

Colored Female Idiots . . . . . 2—366— 743

There have been received during the year:

Colored Males . . . . . 127

Colored Females . . . . . 118 245

Total number of colored under treatment . . . . . 988

Of whom there have been

Discharged restored . . . . . 68

Discharged improved . . . . . 1

Discharged removed . . . . . 1

Eloped restored . . . . . 5— 75

There have died—Colored Males . . . . . 63

Colored Females . . . . . 51—114— 189

Leaving on hand September 1st, 1900 . . . . . 799

#### CLASSIFICATION OF THE COLORED.

Colored Male Lunatics . . . . . 321

Colored Male Epileptics . . . . . 64

Colored Male Idiots . . . . . 8—393

Colored Female Lunatics . . . . . 365

Colored Female Epileptics . . . . . 29

Colored Female Idiots . . . . . 12—406— 799

Of the colored males who have died, there were of pulmonary tuberculosis 9, epileptic shock 11, apoplexy 2, senile exhaustion 9, organic brain disease 6, chronic enteritis 1, marasmus 4,

organic heart disease 7, maniacal exhaustion 5, acute meningitis 1, fracture base of skull 1, miliary tuberculosis 1, unknown 1, asthenia 1, anaemia 1, aneurism 1, cerebral congestion 1, paresis 1. Total 63.

Of the colored females who have died, there were of acute nephritis 1, pulmonary tuberculosis 7, asthenia 4, senile exhaustion 2, acute myelitis 1, miliary tuberculosis 2, epileptic shock 4, maniacal exhaustion 9, syphilis 2, organic heart disease 5, chronic enteritis 5, carcinoma common duct 1, hemorrhagic cystitis 1, cerebral effusion 1, lobar pneumonia 2, chronic nephritis 2, cerebral apoplexy 1, acute enteritis 1. Total 51.

Peter Ogletree, whose death was caused from fracture of base of skull, was an old colored patient, completely demented, and from the best information we could get after thorough investigation, we suppose he must have fallen in his room during the night, which produced the fracture from which he died. A very rational patient sleeping in the next room heard a heavy fall some time during the night.

TABLE NO. 1.

Showing the number of whites admitted during the year, and their respective ages at the time of admission.

### HEALTH.

The general health of the household has been as good as could reasonably be expected. We have had comparatively few cases of acute sickness, when we consider the number treated during the year. We have had no disease of an epidemic character, except influenza in some of the wards, and we should not lose sight of the fact that we began the year with quite a num-

ber of old and feeble cases, and that many of the 699 received during the year were brought to the institution almost in a dying condition from the jails—some of them fearfully emaciated.

From the mortality tables you will see the causes of death, and that very few have died from curable diseases. We have, however, to report one death from suicide, and some fractures, principally of old people falling. Every case was carefully investigated, and we could not justly attach any blame or neglect to anyone. While occurrences of this kind are distressing, they will occur occasionally despite the most careful precaution. I think that we have been peculiarly blessed in this respect when we consider the number of suicidal and homicidal cases, together with the old people and epileptics.

Insanity and tuberculosis still appear on the increase with the negro. By reference to the report of the Pathologist you will see from the post-mortem investigations about 30 per cent of the death of the colored insane were from tuberculosis. We had a ward and separate court especially for those cases, and every suspect was moved to this ward, and they were kept isolated from all other patients as far as possible with the hope that we would at least be able, to a large extent, to prevent its being communicated; but we have been so overcrowded for the past twelve months it has been utterly impossible to isolate them.

Tuberculosis is alarmingly prevalent with the colored insane, especially with the females, with a rapid decline. We have used all possible hygienic means at our command, in our crowded condition, to check it, but I apprehend that we will not be able to combat its spread successfully until we have a separate ward detached from the main building with the very best hygienic surroundings, and every suspect promptly removed to this ward, and I hope your honorable body will find your way clear financially to establish such wards in the near future.

There have been some important improvements in the sanitary condition of the building for the colored insane during the year, which I think now makes the sanitary condition of the entire institution very good.

#### RECOVERIES.

The percentage of recoveries in all institutions for the insane

is calculated upon the admissions during the year. The rate of recovery from September 1st, 1899, to September 1st, 1900, is .49 3-4 per cent, which is higher than last year, and will compare favorably with similar institutions, and it should be remembered that of the 699 patients received or admitted during the year there were more than one-half chronic cases, i. e., insane longer than twelve months, as the records will show—385 chronic and 314 acute and hopeful cases. Some that are reported as acute and curable cases are, upon investigation, found to have been affected much longer than the relatives or friends supposed: they regarding the manifestations of the diseased brain as simply idiosyncracies or peculiarities and not the actions of a diseased brain. Many of the chronic and incurable patients admitted this year were cases of terminal dementia, senile dementia, general paresis, epileptics of long standing, idiots and imbeciles. Such cases are hopeless—not amenable to treatment. We can only care for them. They only add each year to the already large population of incurables. While there are a few cases of long standing that recover, the per cent is so small it does not justify the delay in giving them the advantage of early hospital treatment. It is the acute cases that we get the most favorable results from.

If the insane are put under hospital treatment in three or four months after the first symptoms of insanity are manifested, in my judgment, there would be far less probability of their drifting into a chronic and hopeless condition. There is no disease in which early treatment is of more importance. Delay in a majority of cases results in permanent impairment of the mental integrity.

This institution was opened for the reception of patients October 12th, 1842, receiving all classes—insane, idiots, imbeciles, epileptics and defectives. For the past 58 years a large number of chronic and incurable insane have been added to our population. We have some patients that have been in the institution from 45 to 50 years. The epileptic of long standing, idiots and imbeciles, and defectives are generally for life as we cannot hope to materially benefit them, and I am sorry to say that there seems to be a growing tendency on the part of the county authorities of the State to send this class, however harmless they may be, if they are in any way a burden to the counties or to

their friends. While I think that this class of the afflicted should be properly cared for, they should not be associated with the insane, for it is a decided injury to both. The epileptics should be colonized; the feeble-minded should be placed in schools especially for their care and training. The defectives should be cared for in a reformatory where they could have wise and judicious employment with good moral training. With such care we would be justified in the hope that many of the depraved tendencies might be eliminated, provided they are put under such care in the formative stage of life. Then we might hope a certain per cent of them would be restored to family and society, capable of making a support instead of a burden to family or State. For the good of all, the dictates of humanity demand that this class of the afflicted should be separated from the insane.

#### OVERCROWDED.

Your honorable body fully understands and appreciates the very overcrowded condition of the institution for the past twelve months, and the absolute necessity for increased accommodations for this class of the afflicted. We have now on hand in the institution 2,551 patients, and 200 applicants awaiting admission, with an average of five applications daily—many of whom are confined in the common jails throughout the State. As you know, we have been under the necessity of receiving patients only as vacancies occur, but we have endeavored to give preference to the recent, curable and dangerous cases as far as possible.

We have doubled many, putting two or three in a room when we felt it was not safe to do so. The urgent necessity for more room to relieve this congested condition of the institution and the jails of those confined therein appeals very pathetically to every humanitarian. It is distressing to think of the insane being confined in the common jails, and I feel assured that when the matter is laid before the General Assembly necessary legislation will be promptly taken for their relief.

It is very important that some legislation should be had to prevent those cases of senile imbecility, idiots, paralytics, and other forms of harmless incurables, which cannot be benefitted by treatment, being sent to the institution. Just so long as they are admitted I apprehend the institution will be overcrowded to the exclusion of the acute, curable and dangerous cases. Many

of the acute cases are deprived of the advantages of early treatment when, if they could be received before they drift into a chronic condition, a good per cent would have a reasonable hope of recovery and being restored to family and society, but if they are denied early treatment, in all probability their minds will become permanently impaired, and perhaps they will ultimately get into the institution in a chronic condition, hopeless and incurable, to remain for life, a loss to family and society, and a burden to the State. You can readily see that the reception of such cases as above referred to defeats to a large extent the usefulness and original object of the institution. It was never intended as a poor house.

#### CONVICT INSANE.

I have repeatedly called the attention of the General Assembly, through your predecessors, to the importance of separating the convict insane from the ordinary insane. It is certainly contrary to the dictates of humanity to force the association of insane people, because they are sick, with the worst class of convicts and criminals. It is undoubtedly a great injustice, and in my judgment, if properly appreciated would be speedily remedied by proper legislation; hence I urge the importance of calling the attention of the General Assembly to this matter so that some action may be taken to prevent this unjust association of worthy invalids with convicted thieves and murderers. I can only repeat what I have said time and time again in regard to the flagrant injustice of having the ordinary insane associated with the convict insane. This injustice is condemned by all who have the care of the insane, and they fully agree in the opinion that the wards of a hospital for the ordinary insane are not the proper places for the care, custody and treatment of the convict insane. They cannot be securely kept; a majority of them will ultimately make their escape knowing that we keep no dogs to catch them; hence, the injustice to society that this class should be turned loose on them. Its tendency is to encourage the feigning of insanity for the purpose of escape. They are the most disturbing, demoralizing element we have, and we have to keep them under constant observation—often confined in their rooms, and taking the time of the attendants frequently from the care of the ordinary insane. There is no good reason why a hospital

in connection with the Prison Farm, to accommodate ten or twelve, should not be established for this class, where they could get wise and judicious employment, one of the most important ameliorating and curative treatments for the insane, which we cannot give them here with any degree of safety. The penitentiary has hospitals for those who are physically sick, and why not for those who are mentally sick.

North Carolina has a hospital in connection with her penitentiary for this class of the insane, and I understand that it is giving general satisfaction.

#### PATHOLOGICAL LABORATORY.

In my opinion a well equipped pathological laboratory is indispensable to a well organized hospital for the insane to keep it fully abreast of the times in carrying out the scientific work and research necessary. It is also an indispensable aid in the diagnosis and treatment. There have been many advances in the past decade in psychiatry, and all alienists are looking forward to the scientific work of the pathologist for greater advances, and especially to clinical pathology.

By reference to the report of the Pathologist you will find in detail the large amount of work done in that department during the year, which will speak for itself, and you will also see from the post-mortems made in that department that nephritis, heart lesion and tuberculosis are the leading factors in the causation of death, and that many of those who died during the past twelve months had a combination of two or more of these lesions. Besides the large amount of work done in the laboratory during the year the Pathologist has charge of the reception ward in the white female department. This reception ward is a very important ward, as it requires the mental and physical examination of every patient that comes in. These examinations are made by Dr. Whitaker, the Pathologist, Dr. Perry, and Dr. Mobley, and the examinations, together with the original histories of the case, are filed for reference, also a chart of notes is kept in which is recorded daily for ten days the mental state of the patient, together with the temperature, pulse, respiration, number and character of bowel movements, and amount and character of urinary secretions. A specimen of urine is sent to the laboratory within the first 24 hours after the reception of the

patient for clinical and microscopical examination, and filed with the history of the individual. This work is thoroughly and systematically done.

Dr. Mobley has charge of the female negroes, and similar records are kept in that department.

It gives me great pleasure to state that the Pathologist has discharged his duties with commendable zeal and fidelity, and I think it right, just and proper that his salary should be made at least equal to that of the other Assistant Physicians; hence, I cheerfully recommend it, and trust that you may see your way clear to increase it.

### TRAINING SCHOOL.

This is the fifth year of our Training School for Nurses, and it still continues the same active operations that heretofore characterized it. Miss Cross, the Superintendent of Nurses, who has charge of the school continues to manifest the same lively, active interest in it. The efficiency of the service is shown by the increased interest of the nurses in the discharge of their duties in an easier and more intelligent way. The clinical advantages have been about as usual this year. The advantages of bedside instruction have, perhaps, been better, and the interest generally manifested in the work by the attendants is highly commendable.

### EMPLOYMENT AND AMUSEMENTS.

The usual amusements during the year have been continued, as heretofore, under the supervision of Dr. Whitaker, First Assistant Physician, except when we were quarantined against smallpox. Dr. Whitaker has faithfully endeavored to make the entertainments diverting and pleasant to all, resulting in as much good as possible to the patients.

Aside from medical treatment, my experience for many years enables me to recognize and appreciate fully the great value of occupation and employment of those who have passed through the excited stage. The ameliorating and curative influence of wise and judicious employment cannot be over estimated. The good results are sometimes marvelous in cases that are at a standstill. We have had a larger number of patients employed than usual this year, and I hope to increase the num-

ber next year. We have them employed in every department of the institution—indoors and out, kitchens, dairies, laundries, field and shop, storehouse, yards, garden, sewing rooms, grading, etc. The employment is entirely voluntary on the part of the patient, while we encourage all who are in a physical and mental condition to engage in some employment.

### IMPROVEMENTS AND REPAIRS.

There have been many repairs and improvements made during the year, and some completed that were commenced last year; and there is much yet to be done that is necessary and contemplated at an early date. A hospital for the insane as old and large as this requires constant daily repairs to keep it in order and good hygienic surroundings. I will not go into details in regard to improvements and repairs as the Engineer's report will give you a full and complete account of everything done in his Department.

### FINANCES.

You will see by the report of our faithful and courteous Steward that the finances of the institution have been economically managed, and that the per capita per diem is less than that of last year—being .29-86-100, but it should be remembered that our winter months are our most expensive months, and we are under the necessity of saving up during the summer months so as to bridge over the heavy months of winter, and there are many improvements and necessary repairs to be made, and some are in process of completion now. We will soon occupy the building that was intended as a contagious hospital, and we will probably be able to accommodate 75 or 80, and perhaps more, in this building; so you see we will soon have about 100 more patients than we now have.

The Steward estimates that the amount necessary for the support and maintenance of the Sanitarium for the next two years, 1901 and 1902, to be \$290,000 for each year, and I am satisfied that we could not do full justice to our afflicted charge on less than that amount, and keep the buildings in proper repair; and, as you know, there is a tendency upward in the price of everything we have to buy.

ANNUAL REPORT OF THE  
ASSISTANT STEWARD.

By reference to the report of the Assistant Steward you will see a detailed account of the results of the garden, dairies, and the amount of pork, etc., raised during the past year; the results of which are very satisfactory indeed—much better than last year. The clear profits of this department for the year was \$11,830.24. The amount of pork raised was 60,907 lbs. These hogs were fed entirely from the waste of the tables and kitchens until a very short time before they were slaughtered. I am apprehensive, however, that we will make a failure in our winter vegetables if this dry weather continues much longer. Our principal vegetables for winter use are potatoes, turnips, collards, etc. The outlook now is very unfavorable indeed, and this is a very important crop. If we have to buy them our expenses will be increased, and I fear we will find it difficult to get them fresh for the entire household.

STOREKEEPER.

By reference to the report of the Storekeeper you will find a full and complete account of the management of that department.

MATRON.

The report of our faithful Matron will show in detail the large amount of work done in making and repairing all clothing, bedding, etc., for the entire household. Also the amount of fruit, vegetables, etc., canned, and preserves, pickles, jams, etc., put up for winter use.

APOTHECARY.

The report of the Apothecary will give you an itemized statement of the work done in that department during the past twelve months, the number of prescriptions filled, together with the amount of drugs on hand. The expense of drug account you will see is much less than last year.

DENTIST.

By reference to the report of the Dentist you will see an item-

ized statement of the work done in that department. Dr. Tigner, the Dentist, has been faithful, courteous and attentive to his duties.

#### ACKNOWLEDGEMENTS.

I am under renewed obligations to the many friends of the institution throughout the State for their kind and generous donations of papers, books and periodicals sent to the library for the use of the patients. I want to thank each and every one who has contributed in any way to the pleasure and happiness of the patients. These contributions are blessings; they tend to break the monotony of hospital life, and frequently divert the mind from morbid ideas into pleasant channels.

By reference to the report of the Librarian you will see a list of books on hand, and those contributed during the year, and the names of all who contributed books, papers, or periodicals, as far as he has been able to ascertain them. Many are sent without our knowing from whom they come.

#### ATTENDANTS AND EMPLOYEES.

It is with gratitude that I acknowledge the general good conduct and zeal of the attendants and employees, with but few exceptions, in the discharge of their respective duties. Many of their duties are onerous and trying at times. I am also glad to state that we have a more intelligent and efficient corps of nurses, perhaps, than we have ever had.

#### RELIGIOUS SERVICES.

Religious services have been conducted regularly on Thursday and Sunday afternoons by our beloved Chaplain, Rev. J. H. Mashburn, when the weather would permit, except while we were quarantined against smallpox. We felt that it was a necessary precaution to stop all public gatherings. The attendance generally upon the services has been large, and the conduct of the patients remarkably good, and from all indications the services were generally enjoyed, and many, doubtless, were much encouraged. The patients look forward to the coming of the Chaplain with much pleasure. The Chaplain has attended all calls to bury the dead.

## OFFICERS.

To the officers I desire to record my deep gratitude for the zeal and interest they have manifested in the welfare of the institution, and also to all who have aided and co-operated with me in the discharge of my duties as Superintendent. The best results cannot be obtained in any institution without the inflexible loyalty to and hearty co-operation of subordinates with the Superintendent in everything touching the welfare of the institution.

## TRUSTEES.

To you, gentlemen of the Board, I am deeply grateful for the uniform kindness and cordial support you have given me in the discharge of my duties, and for the kind consideration you have shown me in the frequent trying and perplexing nature of my duties, and for the great interest you have taken and efforts you have made for the welfare of the institution in every particular. As the records will show, you have managed the finances of the institution with the strictest economy compatible with the welfare of the patients and proper preservation of this large property.

Trusting in the future, as in the past, to the guidance of a wise and merciful Providence, I am,

Very respectfully,

T. O. POWELL,  
Superintendent.

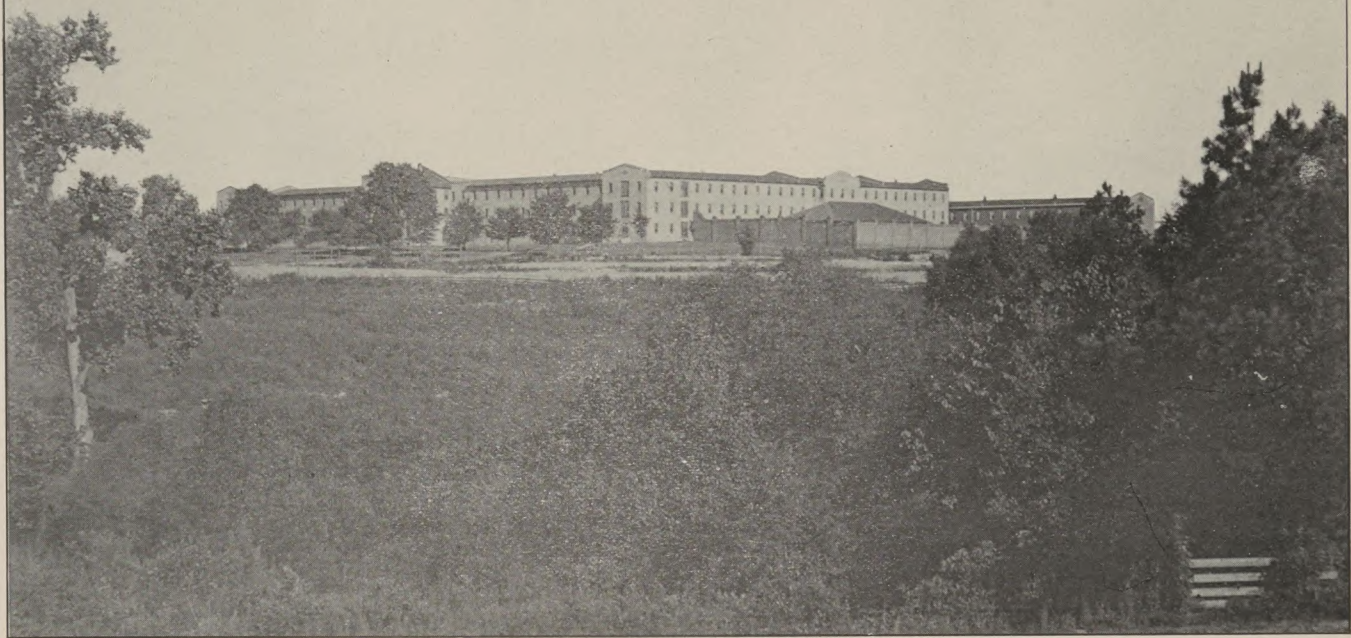

## REPORT OF TRUSTEE NISBET.

To the Honorable Board of Trustees,

Georgia State Sanitarium.

Gentlemen:—In pursuance to the appointment made by you to visit hospitals for the insane in various States, and observe their construction, operation, etc., I left on my trip on May 17th. In the very beginning of my duties I was very much embarrassed as to what was expected of me, and how I should direct my investigations; but finally I determined to visit three institutions of a different kind: one, the wealthiest and, I supposed, the most thoroughly equipped institution in the country, viz, the Government Hospital in the District of Columbia; another, a

PICTURE SHOWING FRONT AND ONE SIDE OF BUILDING OCCUPIED BY NEGROES.

hospital devoted to the care of the colored insane alone, and also a representative of one of the Southern States. So I visited the National Hospital at Washington, D. C., the State Hospital for Colored Insane at Petersburg, Va., and the Western North Carolina Hospital at Morganton, my idea being to compare the working of the other institutions with our own, and to gather any facts of interest, and to note anything that I thought might add to the efficiency of our institution.

Naturally I expected to find in the National Institution everything that an unlimited supply of money would command, but I was not impressed at all with its superiority to others. This Sanitarium is supported directly by Congress, and intended for the insane of the District of Columbia; those of the Army and Navy, and from the Soldiers' Homes of the Northern States.

Number of Inmates . . . . . 2,020

Per capita per annum allowed . . . . . \$220 00

This year the amount given for maintenance is \$440,000.00, with the privilege of drawing from fifteen to twenty-five thousand dollars for ordinary repairs. It is well equipped with every appliance for the care and cure of its inmates—able physicians, abundant attendants and trained nurses, there being one attendant to every eight patients. The pay of the Superintendent is \$4,000 per annum, with commodious apartments, two carriages—one for self and one for his wife, servants furnished, and table supplied without limit. The pay of other officers is about that we give, but there are more of them. The Matron gets only \$600.00 per annum, and the Secretary or Stenographer for the Superintendent is paid \$600.00. The only thing that commended itself to me was the Department of Pathology, to which is assigned two physicians and a photographer. In this morgue, for every cadaver that is not claimed by its friends is dissected, two thousand post-mortems have been made; of their results I will speak later on. I also noticed the provision made for Hydropathic treatment.

After seeing this richly endowed Sanitarium, and hesitating between the Southwestern Asylum of Virginia and Morganton, North Carolina, I selected the latter place.

The Western North Carolina Institution is like Jerusalem of old—"Beautiful for Situation," located on one of the foot hills of the Blue Ridge, and approached by a perfect macadamized

road which rises terrace upon terrace. Its grounds are covered with grass and beautified with many varieties of shade trees. It is an ideal home for the unfortunates; nor can too much be said for this institution. In the first place it is spacious—having almost double the floor rooms of ours, with about sixteen hundred cubic feet of air to the patient. Each room is large, with transom over doors. It is ventilated by air forced through every hall, and lighted by electricity. The buildings are relieved by porches and balconies. The parlors are well furnished. The land is rich in forest and crops, and its Superintendent is an exceptional man in every respect. I saw here the congregate dining halls, one for each sex, where all met except the bedridden. They were handsome, airy halls, and I was surprised at the order maintained. There are two things in their favor; they are all fed and waited upon alike, the food equally distributed and more economically served. But I thought that perhaps mingling the wildly insane with the quiet and convalescent might be injurious to the latter, for among so many congregated together I noticed some noisy and violent, and on the whole, I prefer the system adopted here.

North Carolina and Virginia both have separate sanitariums for the colored insane. I spent awhile at Petersburg near which is situated the asylum of Virginia where they have 800 inmates.

The land attached was in a fine state of cultivation, the labor furnished by the inmates, and the buildings were good and kept in perfect shape. One detached building attracted my special attention—isolated for epileptics. It was built on this plan: from a center hall radiated four wards, and one nurse sitting in this hall could see every door in the building.

Both in North Carolina and Virginia better provision is made for the colored insane than here. They should be in a separate locality, and have plenty of outdoor occupation. In a few years we shall need every foot of room now occupied by our colored population for whites. In the long run is it not better to commence at once to make provision for their future. It is true that it would make a decided change in the rate per capita, but this would not be a loss to the State as it would be saved by the less per capita of the negro institution, which average in North Carolina and Virginia only about \$88.00 per annum. North Carolina has three asylums; two for whites, and one for the colored

race. She has also special wards for the criminal insane. We are much annoyed here, as we all know, by the presence of this class of inmates, and I have thought of this solution of this vexed question. The State has in our immediate vicinity its Convict Farm in most successful operation, and here, where there is already guards, physicians, and strict government these people can be easily provided for. In a conversation with Judge Turner, President of the Prison Commission, he fully agreed with me as to the feasibility of this plan, and stated that he would gladly co-operate with us in any steps looking to this result, and I urge upon this Board some action in this direction.

I had the pleasure of attending the session of the National Psychological Association of America. This body is composed of Superintendents of Sanitariums chiefly of the United States and Canada and trustees of the same without being members, are welcomed and invited to participate in the work of this body. Almost every subject interesting to an alienist, or anyone connected with the care of the insane, was read and discussed. The most important fact seemed to be the rapid increase of insanity, especially among the negroes of the South, and the foreign born of New England States. Upon this subject I am disposed to agree with Dr. P. L. Murphy of North Carolina, who, in an able address recently delivered, says: "Is this increase apparent or real?" viz. "is the increase in the number of insane out of proportion to the increase of population. It is necessary to distinguish clearly between existing insanity and first attacks. All Asylums show a gradual increase in population because of the accumulation of incurable cases. The growth of an asylum is not the measure of increase of insanity among the population from which it draws its patients. The real test is the number of first attacks among the people." Dr. Murphy, quoting from Dr. Babcock of South Carolina shows that the increase in per cent in that State was only about twenty in ten years. As the same circumstances surround the people of North Carolina and Georgia it is safe to conclude that the same per cent exists with us. Dr. Murphy also called attention to the fact that in the last five years insanity in the first attacks in Massachusetts increased 35 per cent while the population only increased 12 per cent. Georgia compares most favorably with a State that claims to possess most of the brains of the Union.

An able paper was read by Dr. Buck of Canada upon the influence of disease of the Genito-Uterine organs in causing insanity in females, in which paper he reports 260 operations with only two deaths, and fifty radical cures. As a physician I have always recognized the intimate relations between these organs and the mental condition of women, and to my surprise the consensus of opinion of the Association was antagonistic to this treatment. While I do not sympathize in the existing fad to cut into the abdomen for everything, yet I have always thought that this branch of surgery had not received that attention here which its importance demands.

You may well ask what conclusions I have arrived at, and so I will simply state what impressed me most. In the first place, as to housing the inmates. I was glad to see that there was a decided opinion against the old way of erecting great prison-like structures such as we have here. In our desire to accommodate our increasing numbers we have been compelled to sacrifice everything to that end,—not how comfortable we could make them, but how many we could house. The new plan is to colonize the patients in distinct buildings, airy and open, with large halls and balconies. Right here we could add much to our buildings by throwing out light balconies from the front and ends of our wards. I saw them running from the lowest to the highest floor, made of light iron, and protected by large wire work. It was not only ornamental but how pleasant for the poor sufferers to sit in winter and bask in the sunshine, or in the summer to enjoy the open air and the open prospects. The saddest sight to me on approaching an asylum is the melancholy faces pressed against the bars like so many convicts. We must do all we can to differentiate in every way possible an asylum from a prison. Another advantage in these balconies, there was a trap-door in the floor connecting with steps one with another, furnishing a most safe and easy fire escape without danger of accident.

There was not a single superintendent that I conversed with that was not bitterly opposed to what you might call a bull pen, or court. It is no relief to a patient to be taken from his room to be caged in a hot enclosure without shade with the reflection from brick walls and earth. See ours. We must remember that our inmates are from the rural population chiefly, that they are accustomed to the open air, to the fields and the sight of the

woods and the streams, and, though more or less insane, they are still painfully conscious of their surroundings. In most institutions all this is abandoned; it is the open door treatment. In the negro asylum of Virginia of 860 patients all but about 40 were out every morning after the cleaning up of the departments. Attendants and patients left the wards, and were out, except to return to meals, all day long, some working, some lolling about in the shade, and others on the grass while all the yards were being opened to sunshine and air. I was told by the Superintendent of the Delaware Sanitarium that out of 300 inmates not more than eight or ten needed restraint, and that all others lived, when the weather permitted, in the open air, and all day long. Further, I was told that escapes were rare, even less than when strict confinement was maintained. Another conclusion I arrived at was that electricity was far cheaper and much more safe than gas. From some figures obtained from Dr. Worsham of Texas I gathered that a plant of seventy-five horse power, with 1,800 lights could be furnished; also power sufficient to run work shop and laundries, with duplicate engine to use in case of accident, for \$9,300. This matter, I think, demands serious thought on our part.

Compared with other Sanitariums we are deficient in bathing-rooms and water closets. Those I saw were paved with tiles, marble basins for the bath rooms, and cleanly kept accommodations in the water closets, such as are found in modern hotels. The rooms were so arranged that they could be fully flushed with water, and were large and roomy. The baths, hot or cold, were so arranged that a dozen or more could be served at one time. and they were not only for cleanliness but for treatment.

Lastly; although I knew that most generous provisions had been made for this class of our people, yet I was impressed by the vast amount that is annually expended by the various States, besides the special endowments that many of the institutions now enjoy, and I naturally ask our Board what good does it do? Does it restore the mind diseased? Often it does not but in a small per cent. Established insanity is an almost hopeless disease. Recent, acute cases are often restored, those of years' standing rarely, if ever. In one institution with a population of over one thousand, there were 86 recoveries under two years, 18 over two years, and only three within three years. In another of 93

recoveries only 4 after two years, and many of these recoveries relapsed.

Despite all the learning, and long and patient study of our best intellects it yet remains an inscrutable mystery. It is true that often it is traced to some organic disease, or some traumatic cause, but pathological research has been disappointing. It has failed to tell us that certain conditions of the brain produce certain forms of insanity. It has failed from certain symptoms to locate the brain lesion, and I was told that often in the autopsies of the most wildly insane, and of different forms of insanity, that the brain presents a perfect normal and healthy condition.

Dr. Powell, in his able address while President of the Association, speaking of the work of the neuro-pathologist, says: "While such work has been of great value, we are beginning now to understand that insanity is largely only a symptom, and that many forms of mental derangement present no pathological changes capable so far of demonstration." Then our chief duty is to alleviate in every way possible the affliction of these people by producing the best medical treatment, making pleasant their surroundings, and not only feeding and clothing them, but weaning them from the distracted fancies and imaginings that becloud their minds, and making this mysterious providence as bearable as possible, remembering that there is hardly a household in this State that this institution does not provide a closet for its skeleton; and also that the well-being of over twenty-five hundred human beings are dependent upon the faithful discharge of our duties.

In conclusion, I thank you, gentlemen, for the honor conferred upon me. My trip was socially delightful and instructive, and I hope that year after year you will give one or more of our members the benefits derived from such an appointment.

I was much aided in my research by the presence and aid of our Superintendent, Dr. Powell, than whom no one stands higher, or more deservingly so, than he. He has been Vice-President and President of the Association, and is in every way an honored and distinguished member.

(Signed)

R. B. NISBET.

REPORT OF PATHOLOGIST.

---

Georgia State Sanitarium,

September 1st, 1900.

Dr. T. O. Powell, Superintendent.

Dear Sir: I present herewith a report of the pathological work of the year ending September 1st, 1900,—this being the fourth annual report in the history of the Pathological Department. It covers a period of eleven months, but as the greater part of the first month, after taking charge of the laboratory, was spent in repairing and re-equipping the apparatus, the actual working time is about ten months.

During this time thirty autopsies have been done. This is a small number compared with the number of deaths during the year; but I have thought best to select my cases and limit the number to as many as could be thoroughly studied. I have divided my time between postmortem examinations and, the equally if not more important branch of the work, clinical pathology. Under the latter head is included the examination of urine, blood, sputum and various secretions.

Below is presented in tabulated form a synopsis of the post-mortem examinations, and the work in urinalysis:

TABLE No. 1.

Case No.	Race	Sex	Age	Mental Disease	Duration	Hours after death	ANATOMICAL DIAGNOSIS
147	C	F	44	Mania, chronic.	Unknown	1	Oedema of pia mater. Atrophy of cerebral convolutions. Brown induration of the lungs. Chronic valvular disease of the heart. Chronic endarteritis.
148	C	F	23	Mania, chronic.	5 yrs.	6	Pulmonary tuberculosis. Concretia cordis. Chronic valvular disease of the heart. Tubercular peritonitis. Tubercular infiltration of liver. Chronic nephritis.
149		M	18	Dementia, epileptic	10 yrs.	7½	Pleuritic adhesions. Chronic valvular disease of heart.
150	C	F	25	Mania, acute	6½ mo	4½	Chronic valvular disease of the heart. Chronic endarteritis. Acute swelling of spleen.
151	C	F	28	Mel'cholia, chronic.	3½ yrs.	1	Atrophy of cerebral convolutions. Pleuritic adhesions. Pulmonary tuberculosis. Chronic valvular disease of heart. Fatty degeneration of liver. Chronic nephritis. Chronic endarteritis.
152		M	21	Imbecility.	Con-gen.	17	Thickening of dura mater. Oedema and congestion of pia mater. Chronic endarteritis. Acute nephritis, engrafted on a chronic nephritis. Acute swelling of spleen.
153	C	M	30	Mania, chronic.	3½ yrs.	6	Thickening and adhesion of dura mater. Oedema of pia mater. Atrophy of cerebral convolutions. Cerebral infarcts. Pulmonary tuberculosis. Chronic endarteritis. Chronic nephritis.
154	W	F	27	Mel'cholia, chronic.	2 yrs.	15	Cerebral oedema. Hydrothorax. Oedema of lungs. Pleuritic adhesions. Fatty degeneration of heart. Fatty degeneration of liver. Chronic endarteritis. Chronic nephritis.
155	C	F	44	Mania, chronic.	9 mo.	2	Oedema of pia mater. Cerebral atrophy. Pleuritic adhesions. Oedema of lungs. Pulmonary infarct. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
156	C	F	39	Mania, chronic.	4 yrs.	9	Congestion of dura mater. Congestion and oedema of pia mater. Atrophy of cerebral convolutions. Pulmonary abscess. Chronic endarteritis. Fatty degeneration of liver. Chronic nephritis.

A PEN OF HOGS RAISED AT SANITARIUM, 1900.

TABLE No. 1—Continued.

No.	Race	Sex	Age	Mental Disease	Duration	Hours after death	ANATOMICAL DIAGNOSIS
157	C	F	51	Mania, chronic.	6 yrs.	17	Pleuritic adhesions. Pulmonary tuberculosis. Chronic endarteritis. Carcinoma of common bile duct. Chronic nephritis. Uterine fibroids. Ovarian cysts.
158	C	M	75	Dementia, senile.	2 yrs	11	Chronic pachymeningitis. Atrophy of cerebral convolutions. Cerebral infarct. Oedema of pia mater. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
159	C	F	39	Mania, acute.	9 mo.	3	Pulmonary tuberculosis. Absence of all bladder. Chronic nephritis.
160	C	M	60	Mania, chronic.	5 yrs.	7	Fracture at base of skull. Thickening of dura mater. Congestion and oedema of pia mater. Subdural hemorrhage. Atrophy of cerebral convolutions. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
161	C	M	33	Imbecility, epileptic.	Congen.	3	Acute pleuritis with effusion.
162	C	M	65	Dementia, senile.	8 mo.	2	Chronic pleuritis with effusion. Pulmonary tuberculosis. Chronic pericarditis. Chronic endarteritis. Tubercular peritonitis. Tubercular infiltration of liver, spleen and kidney. Fatty degeneration of heart.
163	C	M	21	Dementia, epileptic.	12 yrs.	1	Multiple cerebral infarcts, Chronic endarteritis. Pleuritic adhesions. Pulmonary tuberculosis. Tubercular infiltration of abdominal viscera. Chronic nephritis.
164	C	F	43	Mania, acute.	2 mo.	19	Chronic endarteritis. Fatty degeneration of heart. Fatty degeneration of liver. Chronic nephritis. Chronic cystitis.
165	C	M	72	Dementia senile.	8 mo.	4½	Thickening and adhesion of dura mater. Oedema of pia mater. Atrophy of cerebral convolutions. Chronic endarteritis. Chronic valvular disease of heart. Pulmonary tuberculosis. Tubercular infiltration of abdominal viscera. Chronic nephritis.

## ANNUAL REPORT OF THE

TABLE No. 1—Continued.

Case No.	Race	Sex	Age	Mental Disease	Duration	Hours after death	ANATOMICAL DIAGNOSIS
166	W	F	78	Dementia, terminal.	Unknown	6	Carcinoma of skin of forehead. Erosion of frontal bone. Chronic valvular disease of heart. Chronic endarteritis. Pleuritic adhesions. Fatty degenerations of liver. Chronic nephritis.
167	C	F	55	Dementia, terminal.	13 mo.	8	Cerebral atrophy. Slight cerebral effusion. Chronic endarteritis. Chronic nephritis.
168	C	F	25	Mania, recurrent.	1 mo.	4½	Chronic endarteritis. Chronic nephritis.
169	C	F	60	Mania, chronic.	5 yrs.	2½	Atrophy of cerebral convolutions. Cerebral anaemia. Chronic endarteritis. Concretia Cordis. Chronic valvular diseases of heart. Fatty degeneration of heart. Fatty degeneration of liver. Chronic nephritis. Uterine fibroids.
170	C	M	25	Mania, acute.	10 da.	3	Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
171	C	M	55	Mania, acute.	8 mo.	4	Chronic hemorrhagic pachymeningitis. Chronic endarteritis. Chronic nephritis.
172	C	M	65	Dementia, terminal.	4 yrs.	55 min	Hemorrhage in right optic thalamus. Chronic endarteritis. Pleuritic adhesions. Chronic valvular disease of heart. Chronic nephritis.
173	C	M	26	Mania, chronic.	20 mo	1	Atrophy of cerebral convolutions. Chronic endarteritis. Chronic valvular disease of heart. Pleuritic adhesions. Aneurism of thoracic aorta.
174	C	F	35	Mania, acute.	3 mo.	1	Chronic valvular disease of heart.
175	C	M	48	Mania, acute.	25 da.	1½	Softening in caudate and lenticular nuclei on right side. Chronic endarteritis. Chronic valvular disease of heart.
176	C	F	20	Imbecility, cong, epileptic.		3½	Cerebral sclerosis. Pleuritic adhesions. Pulmonary tuberculosis. Concretia cordis. Tubercular infiltration of liver.

## POST-MORTEM EXAMINATIONS.

In this division of the work those cases, especially, have been selected in which a section could be done within a short time after death. This is a point of the greatest possible importance, as it is only in such cases that we may be sure that the changes found are the result of disease and not artifacts. Such precautions are, especially, necessary in neuropathology, because of the rapidity with which post-mortem changes develop in the tissue of the nervous system. From Table No. 1 it will be seen that 9, or 30 per cent of the autopsies have been done within two hours after death; 15, or 30 per cent, within four hours, and 21, or 70 per cent, within six hours. Under such circumstances I think we may reasonably expect reliable work.

By reference to Table No. 1, it will be noted that of the general diseases found to have been present there are three which stand out prominently, by reason of their frequency as well as gravity. They are in the order of their frequency, chronic nephritis, chronic valvular disease of the heart, and pulmonary tuberculosis.

## CHRONIC NEPHRITIS.

Of the 30 cases coming to autopsy during the year 21, or 70 per cent have shown a gross kidney lesion. On microscopical examination three additional cases have shown a sufficiently diseased condition to place them also in this list; so that we have a total of 24, or 80 per cent, of all the cases coming to autopsy presenting the lesion of chronic nephritis. When we compare these figures with the per cent. of adults in general hospitals showing similar disease on autopsy, usually stated at 45 to 50 per cent, the conclusion is forced upon us that there must be some intimate connection between insanity and chronic inflammatory conditions of the kidneys

## CHRONIC DISEASE OF THE CIRCULATORY APPARATUS.

We find that out of the 30 cases contained in Table No. 1, 16, or 53 3-10 per cent, show evidence of chronic valvular heart dis-

case. It is a universally recognized fact that to insure a normal functional activity of an organ it must have a sufficient supply of healthy blood sent to it. It has been repeatedly demonstrated, both, by clinical observation and experimental work on the lower animals, that any serious interference with the circulation to a part will be invariably followed by a derangement of function, and, if continued, is very liable to produce an organic lesion. This is especially true in regard to the nervous system. Dr. F. W. Mott, in his recently delivered Croonian lectures has demonstrated that circulatory disturbance in the cerebrum is a factor of the first importance in the production of degenerative changes in the neurom. Such frequent occurrence of heart lesions seriously affecting the circulation must, therefore, suggest, even to the most casual observer, the possibility of its being a contributing agent in the production of the wide spread degenerations found in the cortex of those suffering from mental disease. In this connection, attention may well be called to another fact shown by Table No. 1, that is, the frequency of chronic endarteritis. In the 30 cases reported, this condition, in a sufficiently advanced state to be demonstrated as a gross lesion, has been present in 24 cases, or 80 per cent. The disease has not been confined to those well advanced in years, as might be supposed, although it has been invariably present in cases over 40 years of age. It was found in two cases as young as 21 years, and of the eleven cases coming to autopsy under 30 years of age a gross lesion of the general arterial system has been demonstrated in 8, or 72 7-10 per cent.

Such an usually high per cent may be explained, in part, by the fact that most of my cases have been in the negro, and from the prevalence of syphilis in this race, we would expect a large number presenting diseased arteries.

Be this condition of the heart and arteries a causal factor *per se* in the production of insanity, or merely the effect of the same toxic substances, which circulating through the brain by its direct action on the nervous elements, produce in them a diseased state, the fact remains that among the insane we find a chronic lesion of the circulatory apparatus in an extraordinarily high per cent of cases.

## PULMONARY TUBERCULOSIS.

By referring again to Table No. 1, we see that of 30 cases 9, or 30 per cent, have shown tubercular disease of the lungs. This is a considerable decrease from the per cent as given in former reports, when the effort at suppression of disease was first instituted here. An analysis of the tuberculous cases, however, shows that of the 9 coming to autopsy probably a large per cent may be said to have contracted the disease since admission to the institution. This is certainly a point worthy of careful consideration.

TABLE No. 2. More Important Gross and Microscopical Change in Brain and Membranes.

Case No.	Race	Sex	Age	Mental Disease	Weight of Brain in gms.	GROSS APPEARANCE	MICROSCOPICAL EXAMINATION
147	C	F	44	Mania, chronic.	900	Dura mater slightly thickened in places. Pia mater congested and oedematous. Considerable atrophy of cerebral convolutions.	Not made.
148	C	F	23	Mania, chronic.	925	Convolutions normal in size but extremely irregular in arrangement. Frontal lobes asymmetrical. Between second and third left frontal convolutions is a space three-quarters of an inch in diameter, where brain substance is entirely absent; the ventricular cavity being visible from the exterior.	Ganglion cells small, angular and deeply stained. Nuclei small and stained.
149	C	M	18	Dementia, epileptic.	1300	Membranes slightly congested. Pia mater adherent to cortex in many places. Brain oedematous. Convolutions normal in size. Consistency increased. Ventricles contain a small amount of fluid.	Many ganglion cells appear swollen and lightly stained. Nuclei for the most part centrally situated, but in some instances are at the periphery. In many cells the nucleoli are excentric. Some cells are small, dark, and have deeply stained nuclei. Vessels are tortuous with walls very much thickened.
150	C	F	25	Mania, acute.	1275	Convolutions show no atrophy, but are poorly developed and irregular in arrangement. Consistency diminished.	Ganglion cells are swollen, lightly and diffusely stained. Nissl granules not well defined. Swelling and excentricity of nucleus present. Some cell proliferation in perivascular spaces.
151	C	F	28	Melancholia chronic.	1070	Marked atrophy of convolutions.	Very marked pigmentation of the ganglion cells of all layers of cortex. Pigment diffusely distributed in cell. Many cells in advanced degeneration. Neurolgic cells increased in number. Slight endarteritis.

152	C	M	21	Imbec.	1275	Dura mater thickened. Pia mater congested and oedematous. Great irregularity in arrangement of convolutions.	Ganglion cells are smaller than normal, deeply stained, and angular. Nuclei small and in many instances stained. Marked pigmentation present.
153	C	M	30	Mania, chronic.	1305	Dura mater thickened and adherent to skull. Pia mater thickened. Slight atrophy of convolutions. Small infarct in second frontal convolution on right side.	Ganglion cells small, deeply and diffusely stained, and misshapen. Nuclei are small, stained, and centrally situated. Some pigmentation present. Vessels tortuous with irregularities in caliber.
154	W	F	27	Melancholia chronic.	1480	Brain anaemic and oedematous.	Many cells, especially in motor region, are quite normal; but for the most part the ganglion cells are small, deeply and diffusely stained, with small, stained nuclei. There is marked pigmentation in frontal cortex.
155	C	F	44	Mania, acute.	1060	Pia mater somewhat congested and oedematous. Some atrophy of convolutions.	Ganglion cells are small, but of normal shape. They stain diffusely. Nuclei are very small and deeply stained. They are for the most part centrally situated, but some are excentric. Pronounced pigmentary degeneration is present. Endarteritis is present.
156	C	F	39	Mania, chronic.	1115	Dura mater is congested. Pia mater is congested and oedematous. Convolutions are atrophied, especially in the frontal region.	A large number of ganglion cells are swollen and diffusely stained. Nuclei are centrally situated. There is pronounced pigmentary degeneration present.
157	C	F	51	Mania, chronic.	1115	Dura mater closely adherent to skull. Consistency of brain increased.	Ganglion cells small, deeply and diffusely stained. Nuclei small and stained. Marked pigmentation present. Decided endarteritis and considerable cellular infiltration of perivascular spaces.
158	C	M	75	Dementia, senile.	1262	Dura mater closely adherent to skull, and very much thickened. Pia mater oedematous and adherent to cortex. Convolutions very much atrophied. Infarct in right temporal lobe.	Very marked pigmentation of ganglion cells. Cells are small, deeply and diffusely stained. Nuclei are small and take the stain. Decided endarteritis present.

TABLE No. 2—Continued.

Case No.	Race	Sex	Age	Mental Disease	Weight of Brain in gms.	GROSS APPEARANCE	MICROSCOPICAL EXAMINATION
159	C	F	29	Mania, acute.	1038	Marked irregularity in arrangement of convolutions.	Tery many ganglion cells, are swollen, lightly and diffusely stained. The nuclei of these cells are eccentric, large and unsustained. Some cells are small with deeply stained nuelei.
160		M	60	Mania, chronic.	1057	Dura mater thickened and closely adherent to skull. Pia mater congested and oedematous. Convolutions atrophied.	Marked pigmentation is present. Many cells are in advanced stages of degeneration. There is decided endarteritis.
161	C	M	33	Imbecility, epileptic.	1092	Convolutions are regular in arrangement, but show decided lack of development.	Ganglion cells are diminished in number. Some ganglion cells are very small, angular and misshapened with small nuclei. Some cells are swollen with eccentric nuclei.
162	C	M	65	Dementia, senile.	1242	Consistency of brain diminished.	Marked pigmentation of ganglion cells of all the layers of cortex. Cells are small, deeply stained with small, stained nuelei.
163	C	M	21	Dementia, epileptic.	1275	Mutiple cerebral infarcts.	Ganglion cells are diminished in number. The cells are very small and angular in shape, and stained diffusely and deeply. Nuclei are small, angular and stained.
164	C	F	43	Mania, acute.	1152	Nothing of special importance.	Not made.
165	C	M	72	Dementia, senile.	1180	Dura mater thickened and adherent to skull. Pia mater oedematous. Marked atrophy of convolutions,	Ganglion cells diminished in number. Some pigmentation more than normal. Considerable degeneration of frontal region. Many cells of motor area normal. Vessel walls thickened.

166	W	F	78	Dementia, Terminal.	970	Membranes connected with new growth over left frontal region. Slight atrophy of convolutions.	Ganglion cells are small and diminished in number, especially in frontal region. They take the stain poorly. Nuclei are small. There is considerable pigmentation.
167	C	F	55	Dementia, terminal.	1020	Slight atrophy of convolutions. Slight cerebral effusion.	Ganglion cells are in part small and deeply stained; in part swollen with large excentrically placed nuclei. Some cells in the motor area are quite normal. Endarteritis is pronounced.
168	C	F	25	Mania, recurrent.	970	Nothing of special importance.	Ganglion cells are mostly swollen and lightly stained. The staining of most cells is diffuse, but some show a few nissl granules near the periphery. Nuclei are large, unstained and centrally situated.
169	C	F	60	Mania, chronic.	952	Atrophy of convolutions. Brain tissue quite anaemic.	Ganglion cells are mostly small, deeply and diffusely stained. In frontal region cells are diminished in number. Some cells present swelling and eccentricity of the nucleus. The vessels are tortuous and have thickened walls.
170	C	M	25	Mania, acute.	1338	Nothing of special importance.	Ganglion cells are swollen and present a honeycombed appearance. They are pale and diffusely stained. The nuclei are large and globular, mostly centrally situated, but some are at the periphery. There is considerable pigmentation present.
171	C	M	55	Mania, chronic.	1120	There is an area of chronic hemorrhagic pachymeningitis over posterior lobes of cerebrum. Consistency is diminished.	Not made.
172	C	M	65	Dementia, terminal.	1080	In the posterior portion of the lateral nucleus of the optic thalamus are two small hemorrhages about the size of a pea.	The ganglion cells are diminished in number, especially in frontal regions. The cells are small with small nuclei. In many cells the Nissl granules are well defined. The neuroglia is increased.

TABLE No. 2—Continued.

Case No.	Race	Sex	Age	Mental Disease	Weight of Brain in gms.	GROSS APPEARANCE	MICROSCOPICAL EXAMINATION
173	C	M	26	Mania, chronic.	1124	Atrophy of convolutions.	Ganglion cells are diminished in number. Cells of the second and third layers are small and angular in shape. In the motor cortex there are many cells which are swollen with eccentrically placed nuclei. The vessels show endarteritis.
174	C	F	35	Mania, acute.	1217	Convolutions are extremely irregular in arrangement. Brain substance somewhat congested.	Throughout the cortex the ganglion cells are much swollen and diffusely stained. The nuclei are eccentrically placed, some being quite at the periphery, and some appear to be passing out of the cell body. Considerable round cell infiltration of the pericellular spaces.
175	C	M	48	Mania acute.		There is an area of softening on the right side involving the posterior one half of the caudate nucleus, and the posterior two thirds of the lenticular nucleus.	The ganglion cells are slightly swollen, lightly and diffusely stained. Some Nissl granules are to be seen. The nuclei are large and globular, centrally situated and unstained. Marked endarteritis is present.
176	C	F	20	Imbecility, epileptic.	774	Marked asymmetry of cerebral hemispheres; the right being very much sclerosed.	The ganglion cells are diminished in number throughout the cortex. They are small, angular and deeply stained. The nuclei are very deeply stained, small and irregular in shape. These changes are very marked in the sclerosed area.

## THE BRAIN AND MEMBRANES. GROSS LESIONS.

From Table No. 2, it will be seen that, while almost every case presents some gross lesion, the most frequent and important changes are those which are found on microscopical examination. Of the gross lesions thickening of the dura-mater, congestion and oedema of the pia-mater and atrophy of the convolutions have been found to exist in a considerable number of cases. All cases of long duration have shown a certain amount of atrophy.

Cortical infarcts were present in three cases.

There are three cases which present gross lesions of sufficient importance to justify more than a passing mention:

No. 172, a case of terminal dementia, who had been for months in apparently good physical condition, suddenly fell in a convulsion involving the muscles of the left side; the muscles of the right side, meanwhile, remaining flaccid. There was complete loss of consciousness. The convulsive movements continued with remissions and exacerbations for about twenty minutes, when he died. On autopsy the only lesion found was two small hemorrhages about the size of a pea each, in the extreme posterior portion of the lateral nucleus of the optichthalmus of the right side. The hemorrhages were an eighth of an inch removed from the posterior limb of the internal capsule and well behind the motor tracts.

No. 175, a case of mania of one month's duration, who was in a state of more or less constant excitement, and died of exhaustion of absolutely no symptom of localized brain disease. Autopsy showed extensive red softening of the striate body on the right side. The lesion involved the posterior one-half of the caudate nucleus, and the posterior two-thirds of the lenticular nucleus, together with some small areas of gray matter found dipping down between the fibres of the internal capsule. The process was of several days duration.

No. 176, a case of epileptic imbecility with a typical paralysis, and contraction resulting from an infantile paralysis involving the left upper extremity. On section a very marked asymmetry was found between the two hemispheres. The left side of the cerebrum was of nearly normal size. The right hemisphere was not more than two-thirds the size of the left. The lesion was limited to the upper three-fourths of the brain. The convolutions in this area were extremely small and dense.

## MICROSCOPICAL EXAMINATION OF THE BRAIN.

In the microscopical work the following methods of staining have been used:

Nissl's method was used almost exclusively for the study of the ganglion cell. Time has proven this method to be the best and most reliable for demonstrating the internal structure of the nerve cell in health and disease.

The method of Marchi has been the one used to demonstrate acute denigrations in the nerve fibres, while the Weigert-Pal stain has been relied upon for showing degenerations of longer standing.

A simple double stain of haematoxylin and eosin has proven the most satisfactory for showing the condition of the vessels.

## THE GANGLION CELL.

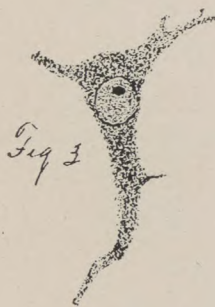

In no case examined has the cortex been entirely normal. In a considerable number of cases many individual cells presented quite a normal appearance, but the cortex as a whole showed more or less extensive changes in every case. A study of Table No. 2 will show that four fairly definite types of cell changes may be differentiated, of which the first two, however, appear to be merely different phases of the same process.

In the first of these types the ganglion cell is swollen, lightly and more or less diffusely stained. Figs. 1, 2, 3 and 4, Plate 1, illustrate cells in this condition from various parts of the cortex. There is extensive chromatolysis; but in what seems to be the earlier stages of the process, some Nissl granules are still to be seen. (See Fig. 1). The nucleus is large and globular, is centrally situated and is unstained or in some instances very slightly stained. This type of cell is found in the acute manias, especially those of short duration. In Cases 168, and 175, where the duration of mental disease was one month and twenty-five days, respectively, this condition was very marked. The process appears to be an early stage of acute parenchymatous degeneration, and is in no sense to be considered as the characteristic lesion of acute mania alone, but may be found in various diseases with cerebral involvement, as: hyperphyxia, insolation, etc.

In the second type of cell change noted, of which Figs. 5 and

PLATE 1.

6, Plate 1, and Fig. 1, Plate 2, are examples, the body of the cell is swollen and quite diffusely stained (chromatolysis). The protoplasm takes a deeper tint than in cells of the first type. The most characteristic feature of the cell is the nucleus. It is excentrically placed, and in some instances appears to cause a bulging of the cell body. (See Fig. 6). The nucleus is usually irregular in shape and may or may not be stained. Cells of this type have been extensively found in my cases of acute mania; but in those of longer duration than the cases referred to as showing a simple swelling of the cell. Some cases, as No. 157, show both types. This condition of the cell, which is a genuine degeneration, may be the result of at least two distinct pathological processes. It may be the result of myelitis as has been repeatedly shown, or it may be the resulting cell change following Walderian degeneration of the axisylinder process, as was first pointed out by Marinesco. I have found it to a certain extent in one of my cases, No. 169, which was a case of chronic mania of five years' duration, where it appeared to be due to a continued cerebral anaemia caused by hemorrhages from uterine fibroids. The process is essentially an acute one from which the cell may recover completely.

In the third type of cell change found, Figs. 2, 3, and 4, Plate 2, the body of the cell is small and angular in shape, and takes the stain deeply and diffusely (chromatolysis). The collateral processes may be traced for a considerable distance from the cell, and that coming from the apex is frequently tortuous. (See Figs. 3 and 4, Plate 2). The nucleus is very small often irregular in shape and deeply stained. (See Fig. 2, Plate 2). This is a chronic condition, and is found extensively in all cases of insanity of long standing. By reference to Table No. 2, it will be seen that such cell change was present in one case classified as acute mania. An explanation may be found, however, if we note the duration of disease, nine months, and bear in mind that it is still unfortunately the practice to diagnose many cases of insanity as acute or chronic by a strict time limit.

Cells of this type may be considered as permanently damaged, and while they may continue to functionate it can only be in a more or less restricted manner.

The fourth type of cell change referred to above is pigmentation. Such cells are the seat of extensive deposits of yellow pig-

ment. It is present to an extreme degree in the senile insanities, and here is, probably, only an increase in the pigment which appears normally in the aged. I have found it, however, in a number of cases of young adults, and in two cases under 25, one of imbecility and one of acute mania.

### THE VESSELS.

Attention has already been called, under the discussion of gross lesions, to the high per cent of cases presenting endarteritis involving the vessels of the general circulation. On microscopical examination of the brain, we find also a large per cent of 3—insert Pathologist's Rep. cases showing some vascular change. The changes most often met with are thickening of the walls, dilatation of Caliber, and tortuosity of course. In some cases there is a marked infiltration of the perivascular spaces with small round cells.

Over seventy years . . . . .		4
Total . . . . .		123

## CLINICAL PATHOLOGY.

The most important feature in this line which has yet been established is a thorough chemical and microscopical examination of the urine of all patients on admission. The specimens are taken within the first 24 hours after reception, and tested for albumen, indican, and acetone in all cases, and for such other substances as may in individual cases be suspected. From Table No. 3, it will be seen that of 260 specimens examined 199, or 76 5-10 per cent, contained indican. This substance is formed almost exclusively by putrefactive changes occurring within the alimentary canal. It may, therefore, be taken as an index of the absorption of toxic substances resulting from defective digestion,

constipation, etc. The finding of such a high per cent of cases presenting indicanuria on admission is strongly suggestive of auto-intoxication as a cause of insanity.

Some points of interest are to be gained from the third division of Table No. 3. Of 260 cases examined 122, or 46 9-10 per cent, showed albumin in the urine. On further examination of these cases it was found that 98 were suffering from genuine Bright's Disease while 24 were cases of temporary albuminuria. But in 27 cases which did not show albumin in the urine at the time of examination on admission, there was present unmistakable evidence of kidney disease. This illustrates well the extreme liability of error occurring where a simple test for albumin is relied upon for the diagnosis of kidney lesions. Of the entire number of cases examined on admission, 123, or 47 3-10 per cent, were found to be suffering from some form of nephritis. Some extremely interesting facts bearing on this subject is shown in Table No. 7. Of the total number 123 cases, having a kidney lesion on admission, in only 66, or 53 7-10 per cent, was the duration of mental disease under one year, and in only 30 cases, or 24 4-10 per cent, was the duration under three months. A very striking difference is found in the per cent of cases showing Bright's Disease on admission, 47 3-10 per cent, and on autopsy, 80 per cent. These facts would certainly incline one to the idea that kidney disease bears a secondary rather than a preliminary relationship to insanity.

Although comparatively little has, as yet, been done in this branch of the pathological work I feel that it has already been productive of results of some importance. While it is quite necessary that post-mortem studies should be continued unabated in order that a correct and scientific morbid anatomy in mental disease may be worked out, yet, it is from the field of clinical pathology that we may expect the greatest results in a practical way. To obtain these results it is absolutely necessary that there be a close and intimate relationship established between the pathological and clinical departments. I cannot emphasize this point too strongly, for without it we can never hope to reach the desired end.

In conclusion I wish to express to you my deep appreciation of your uniform kindness and the interest taken in my work.

I am indebted to Dr. J. W. Mobley, of the staff of Assistant Physicians, for much and valuable assistance during the year.

Respectfully,

M. L. PERRY, M. D.,  
Pathologist.

REPORT OF TREASURER.

Georgia State Sanitarium,  
Milledgeville, Ga., Sept. 1st, 1900.

Dr. T. O. Powell, Superintendent.

Dear Sir:—Herewith please find my report for the fiscal year commencing September 1st, 1899, and ending August 31st, 1900.

Very truly, etc.,

M. A. McCRAW, Treasurer.

M. A. McCraw, Treasurer,

In account with the Georgia State Sanitarium.

## REPORT OF STEWARD.

Georgia State Sanitarium,  
Milledgeville, Ga., August 31st, 1900.

Dr. T. O. Powell, Superintendent.

Dear Sir: I have the honor to hand you herewith my report as Steward, from September 1st, 1899, to September 1st, 1900.

Abstract "A" shows the balance brought forward from the last fiscal year, the amount drawn from the State Treasurer for support and maintenance of the Institution, together with a classified statement of the disbursements, also the balance on hand to be carried forward to the next year.

Abstract "B" shows salaries paid to officers.

Abstract "C" shows wages paid to employees.

Abstract "D" gives in detail the expenditures on account of subsistence.

Abstract "E" gives in detail the expenditures on account of incidental expenses.

Abstract "F" gives in detail the expenditures on account of clothing.

Abstract "G" gives in detail the expenditures on account of fuel and transportation.

Abstract "H" gives in detail the expenditures on account of medical supplies.

Abstract "I" gives in detail the expenditures on account of contingencies.

Abstract "J" gives in detail the expenditures on account of postage and stationery.

HERD OF JERSEYS AT SANITARIUM.

Abstract "K" gives in detail the expenditures on account of repairing building for colored insane, together with the balance on hand carried forward to next year.

Abstract "L" shows the requisitions for support and maintenance of the institutions, drawn from the State Treasurer, in their regular order.

Abstract "M" shows whole cost of supporting the Sanitarium for one year, also giving the average number of patients, and the cost of maintaining one patient for one year, month, week and day.

Abstract "N" shows the average number of patients from 1873 to 1900, both included, together with the per capita cost per diem and per annum.

Our per capita is \$108.99 per annum—twenty-nine cents and eighty-six mills for one day.

I am pleased to report \$448.69 made by discounting bills; also that I have realized from the sale of barrels, sacks, iron, tar, etc., \$1,149.45, which has been used in "Petty Cash" in paying for poultry, eggs, etc.

By reference to the report of Mr. G. W. Hollinshead, Assistant Steward, you will find detailed results from garden, dairies, hogs, etc.; also a report of stock, wagons, utensils and implements on hand.

Our Storekeeper, Mr. W. H. Hunter, reports stock on hand \$8,678.50.

Our Apothecary, Dr. A. G. North, reports stock on hand \$1,188.50.

Through the strict economy of our Honorable Board of Trustees, aided by the diligence and care displayed by the officers of the different departments, we have been enabled to live within the appropriation, but on account of our fast increasing population; the necessity of fitting up the old Hospital for the reception of patients, and the large advance in price of all our supplies, we will be compelled to ask and urge a larger appropriation for 1901 and 1902, and I think \$290,000.00 per annum will be absolutely necessary for the maintenance and support of the Sanitarium.

Assuring you of my appreciation of your uniform kindness to

me, and thanking you for the many courtesies extended me, I  
am,

Very respectfully,

C. H. TROUTMAN,

Steward.

### ABSTRACT "A"

Statement of C. H. Troutman, Steward, Georgia State Sanitarium, giving the balance brought forward from last fiscal year, and all money received; also classified statement of disbursements from September 1st, 1899, to September 1st, 1900.

## ABSTRACT "E"

Giving in detail the Expenditures on Account of Incidentals from September 1st, 1899, to September 1st, 1900:

To Whom Paid	What For	Amount
1899.		
Oct. 5. Cook Lumber Co..	Kerosene.....	\$ 31 25
Sol Barrett..	Grading.....	156 00
Union-Recorder..	Printing.....	26 75
Milledgeville Telephone Co....	Telephone Connections....	9 00
Culver & Kidd.....	Hair Brushes.....	23 68
Johnson & Bethune..	Tin, Etc.....	44 73
Joseph Staley....	Hardware.....	7 76
Stevens Bros. & Co..	Sewer Pipe.....	32 20
Nit. Ammonia Co ..	Ammonia.....	58 97
Southern Spring Bed Co.....	Spring Mattresses.....	250 00
J. A. Horn, Treasurer.....	Lights.....	17 70
T. C. Burke.....	Cement.....	93 00
Good Roads Machine Co....	Plow Points.....	26 60
Standard Oil Co....	Turpentine.....	70 46
C. A. Conklin Mfg. Co....	Buckets.....	49 91
Nov. 5. Cook Lumber Co....	Shingles.....	236 70
Hartford Fire Insurance Co....	Insurance Premium..	62 50
W. H. H. Barnes.....	Lumber.....	627 02
J. M. Long & Co..	Caustic Soda.....	9 95
Troy Laundry Co..	Starch.....	57 43
J. P. Davies.....	Chip-Soap.....	156 60
Standard Oil.....	Oils.....	411 73
Tripod Paint Co....	Oil.....	226 11
E. J. Holley.....	Brooms.....	36 00
C. A. Conklin Mfg. Co..	Tin Ware.....	68 43
Dixon Williams..	Spectacles.....	12 00
Palmer Hardware Co..	Hardware.....	138 21
Medical Publishing Co..	Labels.....	9 36
Brandon Printing Co..	Repairing Typewriter..	7 50
C. J. Belt & Co..	Tool Steel.....	67 21
T. C. Burke.....	Paint.....	105 13
J. W. Ruger Mfg. Co....	Aprons.....	18 00
Telephone Mfg. Co..	Fixtures.....	5 84
Grigg & Co....	Mower Repairs.....	2 36
H. R. Worthington ..	Ammonia Pump.....	245 00
J. W. Craw Co..	Laundry Aprons..	60 15
Western Electric Co ..	Annunciator, etc..	47 13
Lombard Iron Works..	Supplies.....	626 59
Yale & Town Mfg. Co..	Locks.....	66 61
Joseph Staley.....	Hardware.....	3 60
Postal Telegraph Co..	Telegrams.....	82
J. A. Horn, Treasurer..	Lights.....	20 70
Geo. D. Case..	Varnish.....	64 34
J. R. Hines.....	Lime.....	40 12
E. Becker.....	Repair Work.....	10 44
Dec. 5. Southern Nursery Co..	Apple Trees.....	22 50
C. A. Conklin Mfg. Co..	Tin Ware.....	68 43
M. S. & D. A. Byck..	Letter Books.....	26 95
E. J. Holley.....	Brooms.....	36 00
D. R. Wood & Co..	Hydrants.....	44 90
C. Rosenstein & Co....	Matches.....	30 00
The Sanitas Co....	Sanitas.....	62 79

## ANNUAL REPORT OF THE

To Whom Paid	What For	Amount
J. W. Ruger Mfg. Co..	Cup Cutter..	33 00
C. S. Belting & S. Co....	Screws.....	64 67
Knowl Steam Pump Works...	Pump Repairs..	23 55

## REPORT OF ASSISTANT STEWARD.

Georgia State Sanitarium,  
Near Milledgeville, Ga., Sept. 1st, 1900.

Mr. C. H. Troutman, Steaward:

Dear Sir: I herewith hand you my report as Assistant Steward for the year beginning Sept. 1st, 1899, and ending with Aug. 31st, 1900, of the Old and New Dairies, Garden, Pork and Transportation. Also statement of Stock, Wagons, etc., on hand Sept. 1st, 1900. Our fall crops up to now are almost a failure. I have planted rutabagas three times and yet have a very poor stand. Our rough turnips are also a poor stand but they can be planted later and make a good crop. Our late snap beans are a failure, also Irish potatoes and corn. We have lost during the year seven milch cows, three from eating young amber cane and four from calving. The hogs are in fine shape, though we have lost two large ones from unknown causes, five from spaying and altering and fifteen pigs, I think from the very hot weather.

Very respectfully, etc.,

GEO. W. HOLLINSHEAD,  
Assistant Steward.

## REPORT OF DENTIST.

Georgia State Sanitarium,  
Dental Department,  
September 1st, 1900

Dr. T. O. Powell, Superintendent:

Dear Doctor: In making this, an aggregate report of the Dental Services I have done, I beg to say that the department was not prepared to do any organized work until Dec. 1st, 1899.

This report will show what has been done from Dec. 1st, '99, to Sept. 1st, 1900.

I have given immediate attention to patients suffering from acute toothache, acute alveolar abscesses, neuralgia and other acute pains of dental origin.

Patients suffering from chronic troubles, such as pyorrhoea-alveolaris, diseased gums and mucous membrane, abnormal saliva, tartar deposits. Abscesses have been treated, and their mouths put in an hygienic condition. Care and cleanliness of mouth has been much insisted upon.

Teeth not too badly decayed have been filled and made useful. Teeth from long neglect being offensive and unhealthy and beyond repair, have been extracted.

As a rule patients have been well behaved, and I have succeeded nicely in doing whatever was attempted.

In my work I have had the hearty co-operation of each Assistant Physician.

Accompanying this is a table showing the number and character of operations and treatments done.

Very respectfully,

ED. A. TIGNER, D. D. S.

A Table Showing the Number and Character of Operations  
and Treatments.

74—Alveolar Abscesses, acute and chronic. 46—Facial Neuralgia. 29.—Peridontitis. 1—Diseased Antrum, caused from abscessed tooth. 49—Stomatitis. 37—Pyorrhoea Alveolaris. 1—An-

kylosis of Temporo-Maxillary Articulation, caused by impacted 3rd molar. 111—Acute toothache 68—Removing Calcarious Deposits. 52—Cauterizing Teeth, sensitive from erosion or caries. 56—Patient's Teeth Cleaned. 1—Tumor, Fibro-myeloma type, removed. 2—Ulcers on Tongue and Cheek. 3—Operations removing Necrotic Sections of Inferior Maxilla bone; 1st, caused by long standing chronic abscess with external fistulous opening; 2nd, by imperfect uniting of bone after a fracture; 3rd, from injury to alveolar process by patient biting iron bars in jail before coming here. 40—Pulps, Devitalized, Removed, Cavity and Pulp Canals filled. 19—Putrescent Pulps Removed, Tooth Treated, Cavity and Pulp Canals filled. 11—Pulps Capped. 8—Artificial Dentures Repaired. 3—Artificial Dentures made. 3—Artificial Crown Readjusted. 1—Artificial Crown made. 1—Bridge removed. 702—Teeth badly decayed and roots ulcerated and uncleanly, extracted. 597—Teeth filled.

## REPORT OF APOTHECARY.

September 1st, 1900.

To Dr. T. O. Powell, Superintendent:

Dear Sir: Below you will please find my report of Apothecary Department from Sept. 1st, 1899, to Sept. 1st, 1900:

Amount of drugs purchased from Sept. 1st, 1899, to	
Sept. 1st, 1900 .....	\$2,454 79
Amount of drugs sold officers and employes, with deductions from checks were made and for which the	
Apothecary is entitled to credit .....	171 65
Amount of drugs and fixtures on hand Sept. 1st, 1900	1,188 50
Number of prescriptions filled from Sept. 1st, 1899, to	
Sept. 1st, 1900 .....	164 38

Very respectfully,

A. G. NORTH, Apothecary.

REPORT OF ENGINEER.

---

Georgia State Sanitarium,  
Milledgeville, September 1st, 1900.

Dr. T. O. Powell, Superintendent:

Dear Sir: I have the honor to submit herewith my annual report of the workings of this Department from September 1st, 1899, to September 1st, 1900.

Respectfully,

T. H. DeSAUSSURE,  
Engineer.

---

## IMPROVEMENTS.

The building for the accommodation of the ice plant and cold storage rooms, begun during the last fiscal year, has been completed in this. Besides providing a large room for brine tank and cooling coils, this building contains four rooms, aggregating 9,124 cubic feet, which are used as cooling rooms for beef, milk and butter and vegetables. The building is of brick, 77 ft. 6 in. long, by 34 ft. 2 in. wide. The floors are of brick arches on steel beams, and tiled. The walls, ceiling and floors are insulated in the best known manner, and the meat rooms are provided with overhead tracks and travelling hooks. All of the cold storage rooms are provided with brine circulation coils which enables us to keep the temperature as low as 20 degrees, if necessary; or at any point above that desired. There has also been added as an annex to this building a room 31 feet by 13 feet, which will be used as a milk and churn room. The ice works machinery has been improved by the addition of a new and larger brine pump, a new duplex ammonia pump and a condensed water

tank, a re-arrangement of the original machine has resulted in a marked improvement of its efficiency.

### SEWING ROOMS.

Two rooms in basement of main building have been fitted up as sewing rooms. Floors have been laid, ceiling plastered, sash put to windows, woodwork painted, steam heat and watercloset put in, and shelving and closets made for clothing.

### HOSPITAL BUILDING IMPROVEMENTS.

During the early part of the year the Hospital building was made ready for the reception of any possible cases of smallpox we might have. To this end two waterclosets and bath rooms were fitted up and a sewer 650 feet long was laid to connect to main sewer. A 10-foot wrought iron range, and a cast iron sink put in one of the large rooms in the rear part of building, and all of the windows of the building were fitted with wire guards. Four hundred and sixty feet of 4-inch cast iron water main was laid to and around this building and two fire hydrants placed. A complete hot water apparatus was erected and the bath rooms and kitchen piped for hot and cold water. There is now in process of erection a wooden dining room and kitchen building 66 ft. 6 in. long by 26 feet wide. This dining room will seat one hundred and twenty-five people. The kitchen will have brick floor grouted with cement, water closets and bath rooms.

Six water closets and bath tubs were put into the annex of Negro Building; and 800 feet of sewer pipe laid to connect them with main sewer.

### GRADING.

The grading of the "Avenue," begun last year, has been completed. In this work 22,447 cubic yards of earth have been moved. The embankments have been protected by planting out Bermuda grass on the slopes.

At the coal chutes much work has been done on the approach; and 128 ft. of 24 in., 350 ft. of 18 in., 190 ft. of 12 in. and 80 ft. of 8 in. sewer pipe laid, taking care of the surface drainage in that vicinity.

## SHINGLING.

Eighty-eight thousand shingles have been used in re-covering two of the wooden buildings on the premises.

In addition to the usual amount of ordinary repairs about the buildings, the carpenters have made the following articles:

1 Well house.	12 Small Voucher Boxes.
4 Well curbs.	6 Hickory rods for blasting.
7 Sets of shelving.	1 Tobacco box.
10 Single trees.	6 Towell rollers.
2 Plow stocks.	1 Biscuit roller.
4 Doubletrees.	8 Clothes racks.
1 Wagon hound.	16 Commodes.
6 Wagon bodies.	222 Coffins.
2 Bed bolsters.	52 Boxes for shipping coffins.
4 Coupling poles.	31 Window wire guards.
1 Carriage body.	40 Milk pan covers.
3 Large Voucher Boxes.	1 Lawn swing.
10 Window sash.	7 Tables for sinks.
1 China closet.	26 Dining room tables.
1 Standing desk.	26 Hopper seats.
2 Book cases.	5 Rooms floored.
3 Large medicine cases, with drawers, cupboards and shelv- ing.	1 Carriage house, 18x22 feet.
1 Case for annunciator wires.	2 Battened shutters.
5 Doors for cold storage.	8 Step ladders.
1 Case with 252 drawers.	2 pair steps.
10 Pannel doors.	1 New stairway, cut in building.
9 Lattice doors.	159 Shuck mops.
2 Battened doors.	13 Small tables.
1 Framed work for wagon scales.	2 Large gates in wall.
59 Boxes for books.	50 Hoe handles.
1 Platform at ice works.	4 Feed troughs, 18 ft. long.
30 Lattice benches.	1 Bedstead.
1 Desk and stand.	1 Box for mixing dough.
	2 Blind screens.

MATRON'S REPORT.

Georgia State Sanitarium,  
September 1st, 1900.

Dr. T. O. Powell, Superintendent:

Permit me to submit the enclosed as my report for the year ending Sept. 1st, 1900. I would add that repairing has been done for the Institution and all scraps and remnants have been put to a good use, and have been properly accounted for through the Storekeeper's office. All of which is respectfully submitted.

MRS. J. M. DARNELL, Matron.

## REPORT OF CHAPLAIN.

Georgia State Sanitarium,  
Milledgeville, Ga., Sept. 1st, 1900.

Dr. T. O. Powell, Superintendent:

Dear Sir: In submitting my report as Chaplain of the State Sanitarium, permit me to say, that I have endeavored to discharge the duties of my office faithfully and conscientiously. The services have been well attended both on Thursday and Sunday afternoons, and have been characterized by a spirit of seriousness and earnestness, with the most perfect order, such as is rarely seen in any congregation, no matter how cultured or refined. The singing under the direction of the accomplished, and most efficient organist, Mrs. West, has been excellent indeed; it often surpasses that heard in places of great pretensions. To the noble, high-toned gentlemen, composing the Board of Trustees, I tender my thanks for their unvarying kindness. And to you, sir, I am grateful for the hearty co-operation given me in my work, and the many delicate and Christian courtesies shown me.

Respectfully,

J. H. MASHBURN, Chaplain.

REPORT OF LIBRARIAN.

Georgia State Sanitarium,  
September 1st, 1900.

Dr. T. O. Powell, Superintendent:

Dear Sir: Below you will please find my report for the year ending September 1st, 1900:

Number of volumes received to Sept. 1st, 1899 . . . . .	11,173
Hon. C. L. Bartlett . . . . .	3
Miss Sallie Lockhart . . . . .	1
Miss Claudia Troutman . . . . .	3
Mr. A. B. Babb . . . . .	1
Mr. D. H. Hollis . . . . .	1
Mr. R. L. Morris . . . . .	2
Mrs. Wm. M. Wadley . . . . .	76
Miss Jule Trippe . . . . .	6

Number of volumes received in all . . . . . 11,266

I have received the following newspapers and periodicals for the year ending Sept. 1st, 1900:

- 1 copy Macon Telegraph, daily.
- 1 copy Journal, Atlanta, daily.
- 1 copy Enquirer-Sun, Columbus, by Publishers, daily.
- 1 copy Morning News, Savannah, by Publishers, daily.

PRESIDENT BOARD OF TRUSTEES.

ANNUAL REPORT  
OF THE  
BOARD OF TRUSTEES  
OF THE  
GEORGIA STATE SANITARIUM

For the Fiscal Year Ending September 1st, 1901.

---

*To His Excellency, Allen D. Candler,*

*Governor of Georgia.*

In compliance with Section 1421 Code of Georgia (1896) the Board of Trustees of the Georgia State Sanitarium respectfully submit Annual Report for the fiscal year ending September 1st, 1901. The Annual Reports of the various officers occupying the positions of heads of departments in this institution have been read and adopted by your Board of Trustees and are submitted as parts of the Annual Report of the Board in order to set forth to your Excellency and the General Assembly the conduct and management of the several departments of the Sanitarium.

The report of Supt. Powell shows that the number of inmates of the Sanitarium on September 1st, 1901, is 2,595. Of this number 1,822 are whites, and 773 colored.

During the fiscal year just closed 451 whites and 252 colored were received into the institution. During the same period of time the number of inmates who were either discharged, eloped, removed or died was 651.

The average number of patients during the year ending September 1st, 1901, was 2,573. During the preceding year the average number in the Sanitarium was 2,495. It will thus be seen that the average number of patients in the institution for the year embraced in this report was 78 more than in the previous years.

The report of our able Superintendent shows that the percentage of recoveries of patients on the basis of the number received during the year was 46.9. The previous year 49 3-4 per cent. of patients received during the year recovered. We invite your especial attention to the views of Supt. Powell on this subject as presented in his annual report. We heartily endorse what he says as to the urgent necessity of Sanitarium treatment of recent cases of insanity.

We invite your attention to the fact that the general health of the inmates has been remarkably good considering the overcrowded condition of the institution.

Tuberculosis is the only contagious disease which has invaded our population during the year. We point with pride to the fact that notwithstanding smallpox has invaded almost every county in Georgia during the last three years no case of this dread disease occurred within that period of time among the inmates of the Sanitarium. This gratifying state of affairs undoubtedly resulted from rigid enforcement of the rule of the Board of Trustees forbidding reception of patients from counties in which smallpox exists. While the rigid enforcement of this rule appeared harsh in some instances, yet the beneficent result should silence adverse criticism. Your Board, while ever desirous to promptly open the doors of this great charity to all insane citizens of Georgia, appreciated the fact, and acted

upon it, that our first duty was to protect the unfortunate insane within our doors from the loathsome malady, smallpox.

## OCCUPATION AND AMUSEMENTS.

Your Board have, to the fullest possible extent, heartily seconded the policy of Supt. Powell in the matter of occupation and amusement of patients. In suitable cases patients have been encouraged to engage in occupations which would benefit them mentally or physically. No patient is required to engage in work of any kind, but it has been the policy of the management to encourage certain classes of patients to do a reasonable amount of work such as suited to individual cases. Some of the males gladly availed themselves of the opportunity to work in the farm, gardens or dairies, or engage in grading the grounds. The females were permitted to do sewing, work in the laundries, etc. Few if any of them did a full day's work. The idea in furnishing occupation to them was primarily for its beneficial effects upon the minds and bodies of the patients and not as a mere matter of financial gain to the institution.

We heartily endorse, and shall soon put into execution, the policy of colonizing a number of patients on the farm lands of the Sanitarium. By adopting this policy it will not only be financially beneficial to the institution, but will, above all else, prove beneficial to patients both mentally and physically. We beg to emphasize the fact that in furnishing employment to patients only suitable employment is permitted among them, in other words, judicious employment of patients is encouraged, while hurtful or undue work is forbidden.

As far as possible we have provided suitable amusements for the inmates. We invite your attention to Supt. Powell's report on the subjects of occupation and amusements.

## CONVICT INSANE.

We again call attention of the General Assembly to this subject. We heartily concur in the opinion of Supt. Powell when he claims that it is an outrage to force the ordinary insane citizens of our State, in consequence of their misfortune, to associate with criminals. We beg the Legislature to protect our unfortunate, innocent wards from this cruel injustice.

## REPAIRS AND IMPROVEMENTS.

As some of our buildings are old we find an increasing need for repairs. This item necessarily increases with the age of the several structures and the cost is greater each succeeding year.

A number of much needed improvements have been made during the year just closed.

We invite your attention to Engineer DeSaussure's report for detailed statement of repairs and improvements made since our last Annual Report.

## EXPENDITURES.

The per capita cost of maintenance of the Sanitarium for the year embraced in this report was 30.29 cents per diem. This is 23-100 of a cent per patient per day in excess of the cost of maintenance of the institution for the previous fiscal year. With exception of the fiscal year 1900 the cost of maintenance of the Sanitarium for the year just closed was the lowest in the history of this institution.

For comparison we append the following table showing the per capita cost of maintenance of the Sanitarium for the last 29 years:

## ABSTRACT

Showing average number of patients in this institution, the per capita per diem and the per capita per annum from 1873 to 1901, inclusive.

Year.	Number of Patients.	Per Diem.	Per Annum.
1873 .....	550 .....	52 1-2 .....	\$190 70
1874 .....	550 .....	48 1-2 .....	177 36
1875 .....	600 .....	37 1-2 .....	136 80
1876 .....	600 .....	37 3-4 .....	137 77
1877 .....	638 .....	36 63-100 .....	133 70
1878 .....	725 .....	34 55-100 .....	126 11
1879 .....	748 .....	32 9-10 .....	120 10
1880 .....	820 .....	35 64-100 .....	130 09
1881 .....	886 .....	33 9-10 .....	123 74
1882 .....	942 .....	38 5-8 .....	140 98
1883 .....	1005 .....	33 3-10 .....	121 46
1884 .....	1179 .....	34 3-4 .....	126 90
1885 .....	1232 .....	34 18-100 .....	124 76
1886 .....	1237 .....	33 1-2 .....	123 19

The difference in cost of maintenance of the institution for the year just closed was but slightly more than that of the previous year, being only \$1.57 per patient per year more for the fiscal year 1901 than for the fiscal year 1900. The causes of this increased cost of maintenance for the fiscal year 1901 are fully set forth in the reports of the Steward and Superintendent, and we refer you to these reports for further information on

this subject. Your Board of Trustees wish it to be distinctly understood that while they appreciate the fact that as custodians of a public trust they have faithfully and constantly endeavored to exercise due economy in maintenance of the Sanitarium, they have had in mind the fact that efficiency of service to our helpless wards is our first duty in the exercise of our trust and that in endeavoring to administer the affairs of the institution we have never attempted to run the Sanitarium for the least possible dollar. Rigid economy has been our constant guide so far as it was compatible with efficiency of service.

An examination of the cost of maintenance of our institution in comparison with that of like institutions in other States, will, we are sure, convince the General Assembly that under like conditions our Sanitarium is more economically administered than an institution of its kind in America.

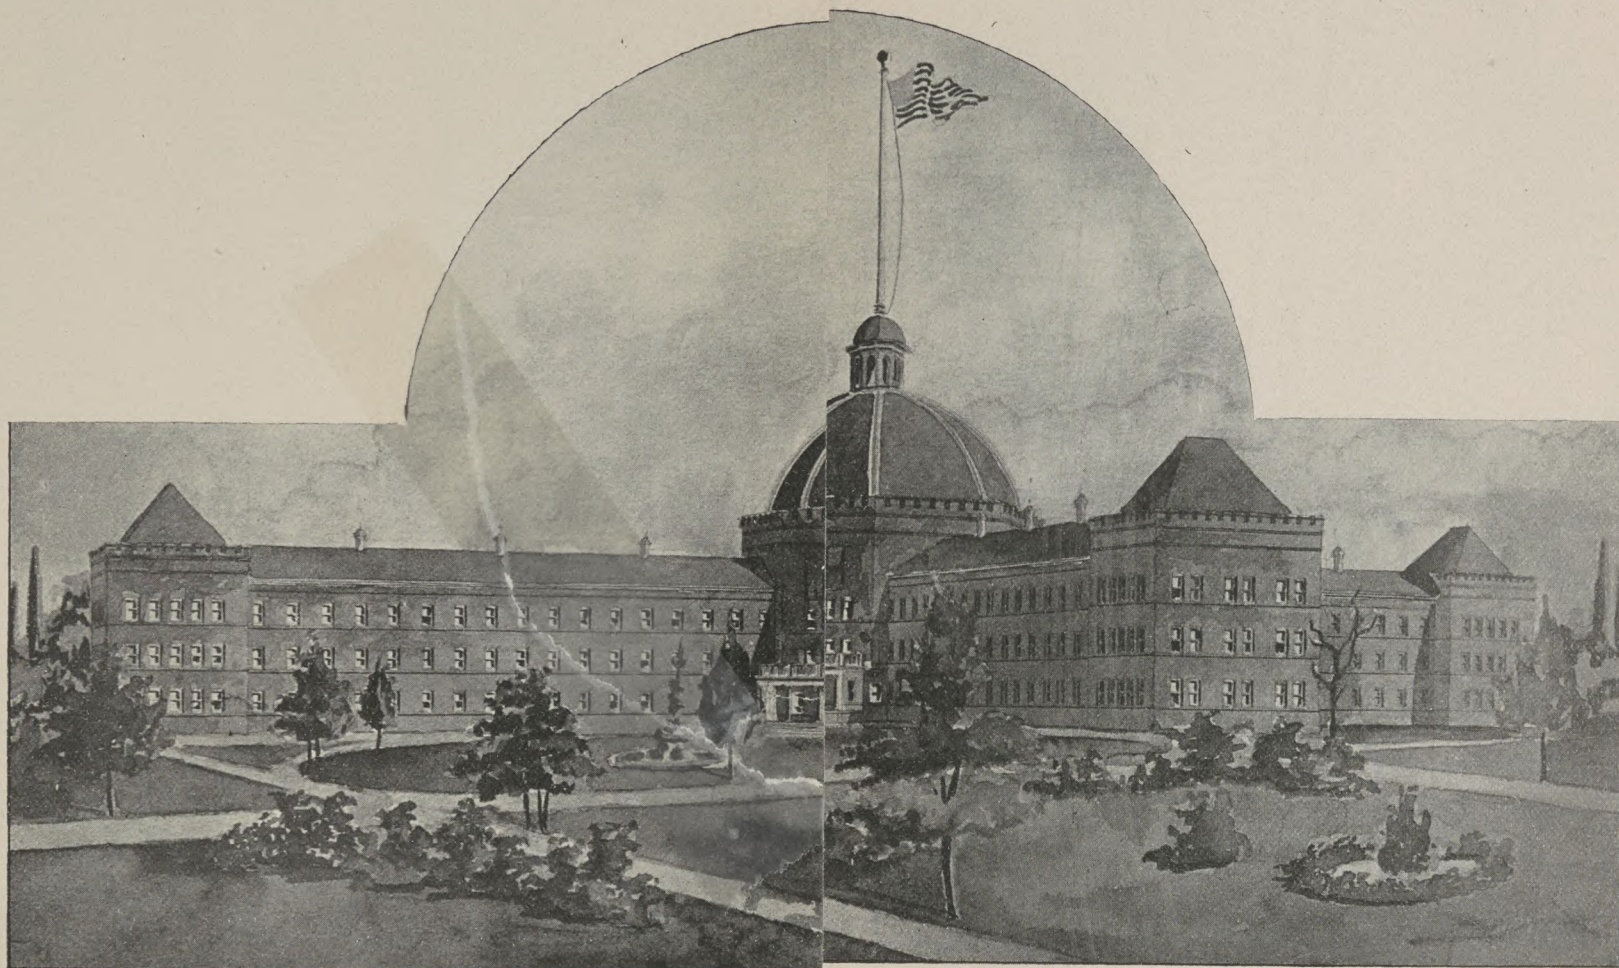

On the subject of comparative management we ask your attention to an extract from report of Trustee Van Buren, herewith published, showing that our institution is more economically managed than any one investigated by him.

Judge Van Buren is one of the best business men in our State, and a trustee of great intelligence and keen observation. He, at the request of this Board, visited a number of Lunatic Asylums and closely examined into their conduct and management in comparison with our institution. This Board takes this opportunity to thank Trustee Van Buren for his valuable services in this matter.

#### ENLARGEMENT.

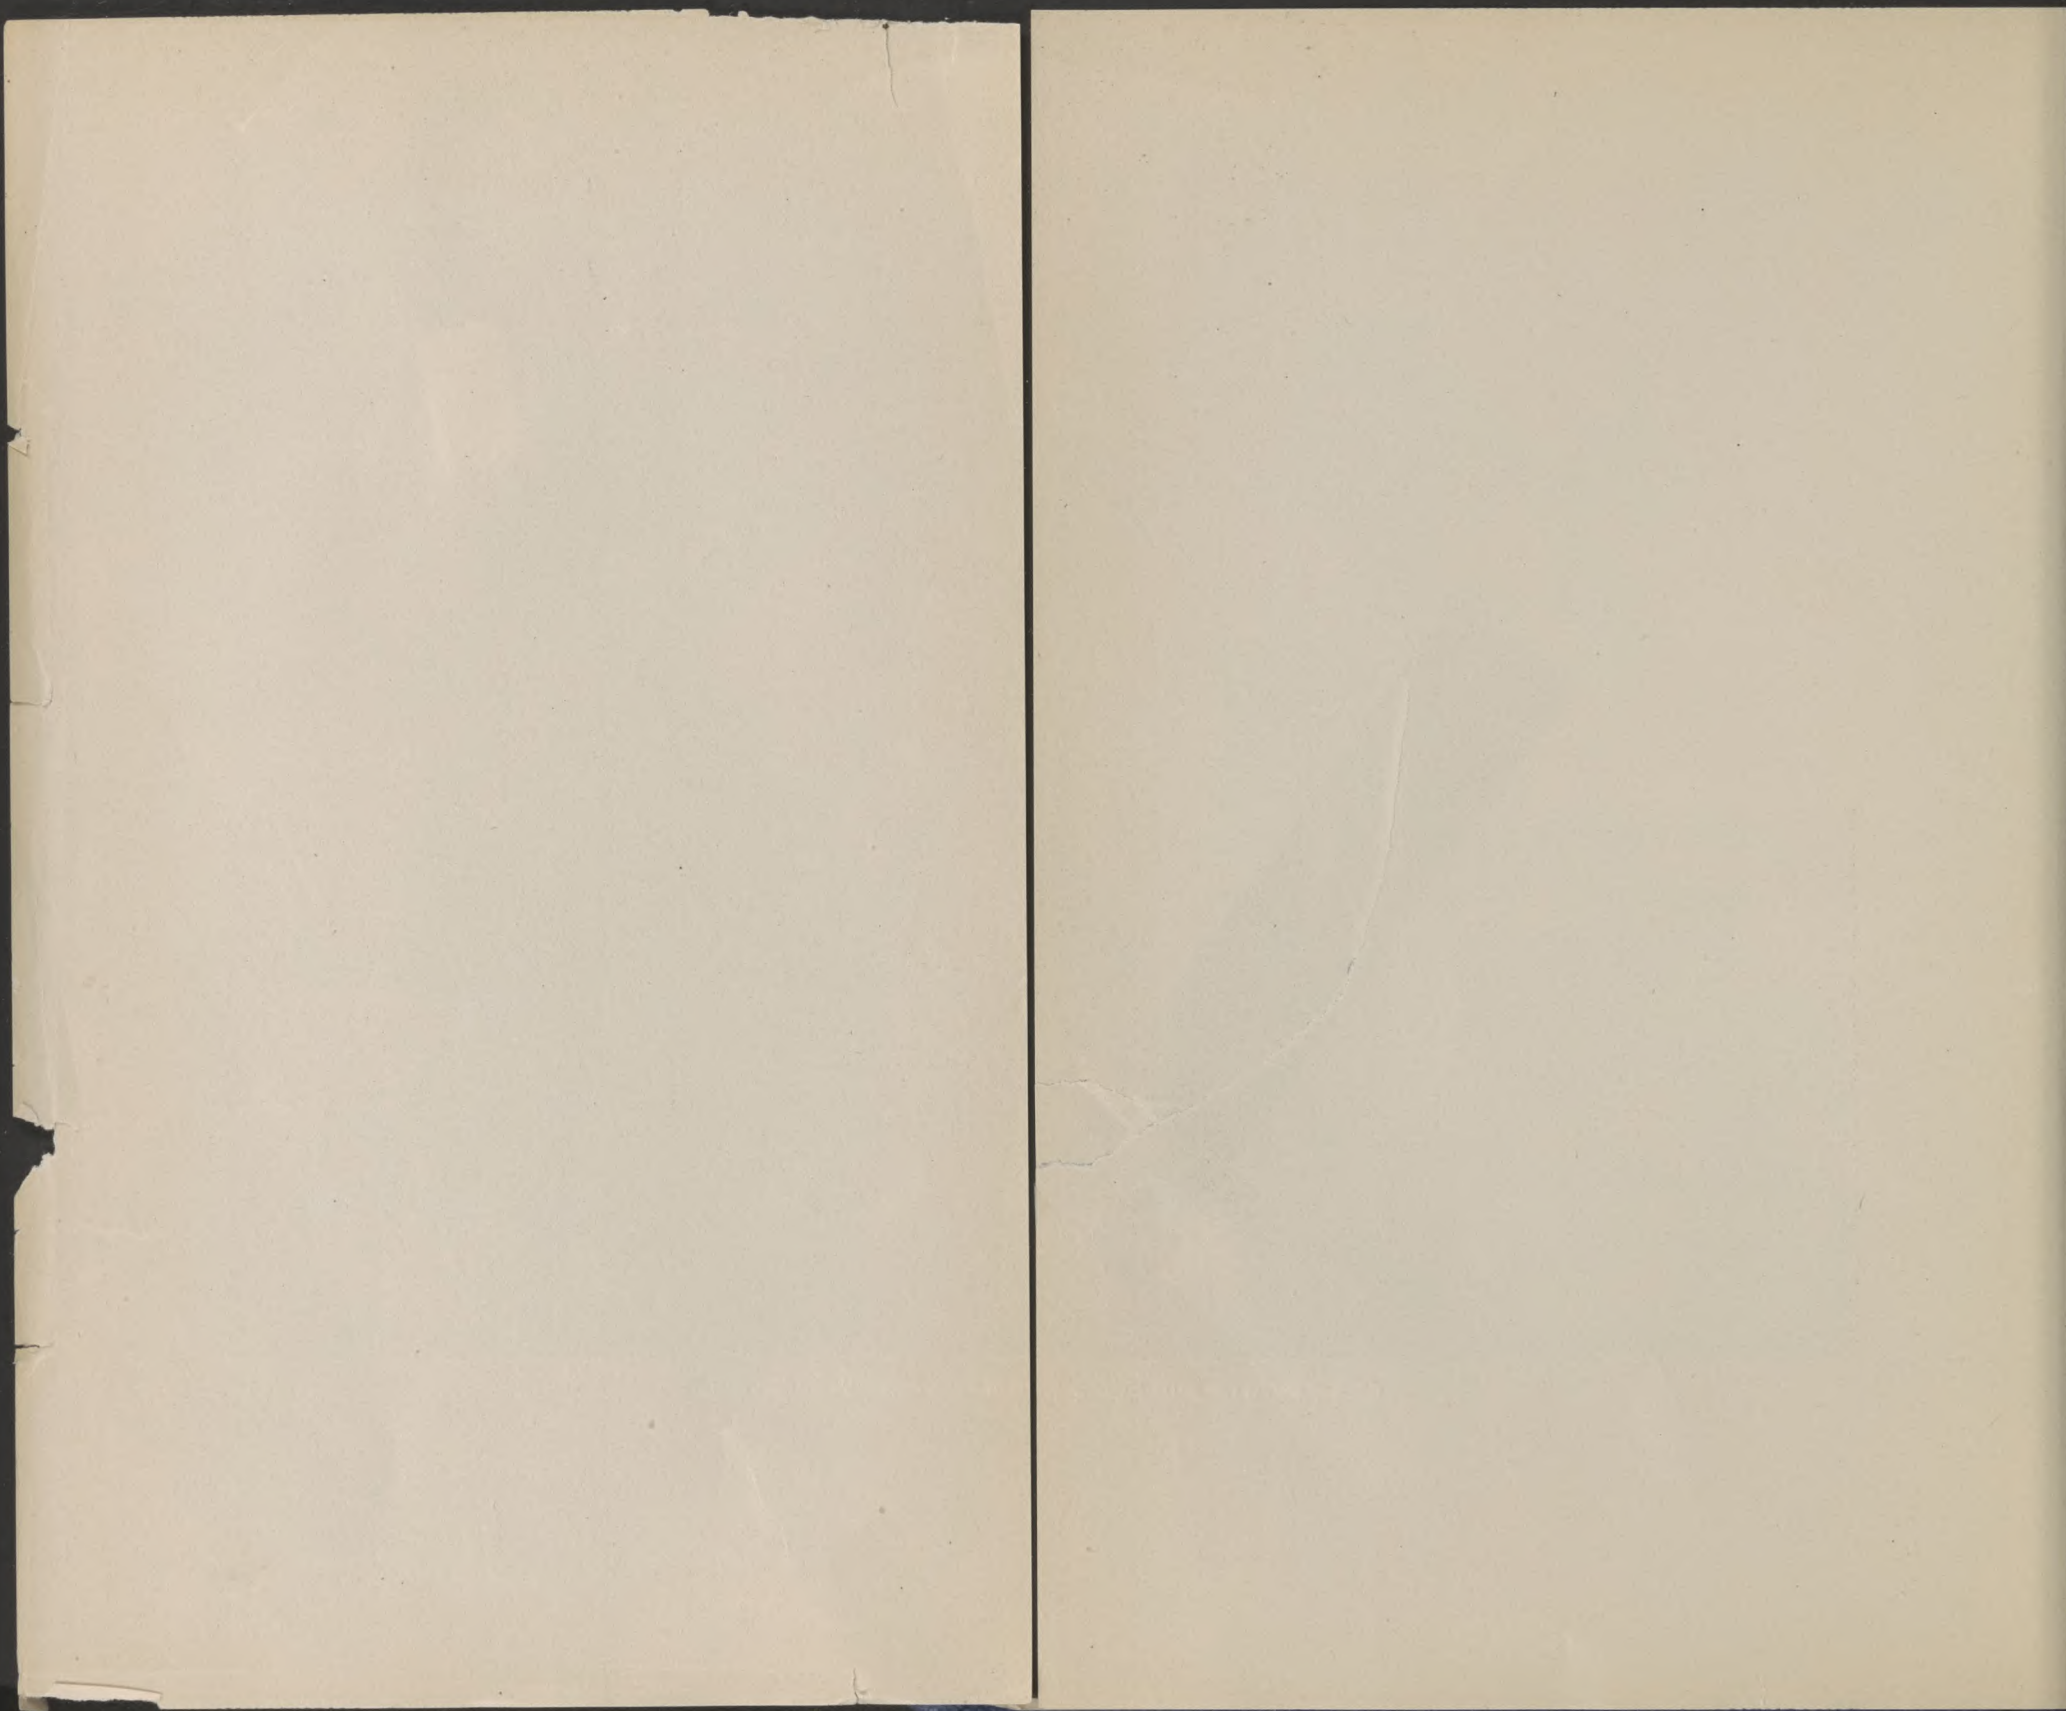

At the last session the General Assembly voted \$150,000.00 to be expended by your Board of Trustees for additional accommodations of the insane. Immediately after the appropriation was made your Board had preliminary plans and specifications and detailed estimates of cost prepared, and architects were

ONE OF TWIN BUILDINGS NOW IN PROCESS OF ERECTION.

invited to submit competitive plans. The plans of J. W. Gulucke & Co., architects of Atlanta, were accepted. Then contractors were asked to bid on these plans. On opening the bids this Board awarded the contract to T. O. Brown & Son, contractors, of Augusta, for \$140,500.00. The balance of the appropriation will be expended in paying architects' fees, grading grounds and necessary interior equipment of the building. The plans contemplate two buildings (twin structures, capable of accommodating 1,448 patients). Perspective of one of these twin buildings is made a part of this report. From the amount of money to be expended compared with large capacity of the buildings you will, of course, understand that the structures will necessarily be plain exteriorly, and somewhat unfinished interiorly, especially as to plastering in some of the wards. We hope to remedy this last defect by reducing the capacity to the extent necessary to plainly complete the interior of the structures. The grading was not a part of the contract as all buildings provide for a level site. This item will cost approximately \$3,000.00. Grading is being done by a force employed under Engineer DeSaussure as superintendent of construction, and part of the work is being done by patients. The grading is nearly completed, and the contractor will commence laying brick within the next 30 days. Under the contract the buildings complete in every respect are to be turned over to your Board on the first day of May, 1903. The contractor is under forfeit bond to surrender to the institution \$10.00 per day for every day that the structures are unfinished after the 1st day of May, 1903.

With these buildings completed and the colored males colonized as outlined in this report accommodations will then have been provided for all insane in Georgia for at least ten years thereafter.

The report of the Librarian shows the extent, management and needs of the Library maintained for patients. This Library

is a great blessing to the patients and through you we appeal to citizens of Georgia to generously contribute books and periodicals to it. In so doing they will do something to bless and brighten the lives of our unfortunate wards. The Board of Trustees will pay express charges on all books and periodicals contributed to our Library. We sincerely trust that this appeal will result in generous donations of books and periodicals. We will highly appreciate donations of one copy of each newspaper published in the State. Every county in Georgia, is represented in our population and the opportunity to read home news will be assured to all inmates if a copy of each newspaper published in our State be sent to our Library. We request the Ordinary of each county to request the proprietor of each county newspaper to donate a yearly subscription to the Reading Room of our institution.

#### MATRON'S DEPARTMENT.

We invite your attention to the detailed report of our worthy Matron, as it shows the amount of sewing done by patients with the aid of several employes. While, as you will see, a vast amount of work was done in this department it represents the free choice of patients, and is resorted to primarily to furnish them healthful employment. No one of them is required to do any kind of work, but all who will be benefited thereby are encouraged to engage in moderate employment. The beneficial effect of such exercise is fully set forth in Supt. Powell's report. Our Matron is one of the best of women and is indeed a mother to every patient. Considerate, patient, kind to every one, her influence over her helpless wards is indeed beautiful to behold.

#### DEATH OF TRUSTEES DUNCAN AND NISBET.

During the year just closed the "Death Angel" visited our ranks on two occasions and removed from the scenes of their earthly labors Trustees Wm. Duncan, of Savannah, and R. B. Nisbet, of Eatonton. Both of them were old time Southern

gentlemen and had each attained distinction as physicians. They were deeply imbued with a high sense of the responsibility which their positions as trustees of this great charity imposed upon them. They attended the meetings of this Board regularly, labored faithfully for the welfare of the inmates of this institution and were ever wise counsellors and treated their fellow trustees with that consideration and courtesy which bespeaks the gentleman. In token of the high esteem in which Trustees Duncan and Nisbet were held by this Board, and as a memorial of their consecrated services to the welfare of the Georgia State Sanitarium your Board of Trustees have ordered that a page of this report be dedicated to the memory of our dead co-laborers. Peace to their ashes; honor to their memories.

We return thanks to the General Assembly for generous appropriations for enlargement and maintenance of the Sanitarium, as well as the unusual interest which the members of each house have shown in the welfare of the inmates.

We beg that your Excellency will permit us to thus publicly acknowledge our deep sense of obligation to you not only for wise counsel in the management of the affairs of this institution, but as well for the personal interest which you have manifested in the welfare of the inmates, and for your faithful and untiring efforts to sustain this Board in the discharge of their onerous and trying duties.

Respectfully submitted,

Board of Trustees Georgia State Sanitarium.

The first of these is the fact that the American Medical Association has been successful in securing the passage of the Federal Food and Drug Act, which is a landmark in the history of the regulation of the food and drug trade in this country. This act is a comprehensive one, covering the entire field of food and drug regulation, and it is a very important one, as it will result in the elimination of many of the dangerous and worthless products which are now being sold to the public. The second of these is the fact that the American Medical Association has been successful in securing the passage of the Federal Food and Drug Act, which is a landmark in the history of the regulation of the food and drug trade in this country. This act is a comprehensive one, covering the entire field of food and drug regulation, and it is a very important one, as it will result in the elimination of many of the dangerous and worthless products which are now being sold to the public. ## REPORT OF SUPERINTENDENT

---

For Fiscal Year Beginning September 1st, 1900, and Ending  
September 1st, 1901.

---

Georgia State Sanitarium, Sept. 1st, 1901.

To the Honorable Board of Trustees,

Georgia State Sanitarium.

Gentlemen: In compliance with the law and rules of the institution, I herewith submit for your consideration the annual report of this institution beginning September 1st, 1900, and ending September 1st, 1901, with reports of Steward, Treasurer and other officers, which you will find hereto appended, and a detailed account of the operations of the Sanitarium for the past twelve months; and I trust that you will find all the necessary statistical information in regard to the movement of the white and colored population. Also an itemized statement of expenditures, and for what purpose; showing in detail the amount of provisions, clothing, bedding, drugs, etc., purchased, from whom, price paid, and aggregate cost. Also balance of money appropriated for support and maintenance in the hands of the Sanitarium Treasurer, together with such suggestions as I deem advisable in the management of the affairs of the institution.

On September 1st, 1900, there were white patients on hand, 1,752, and colored, 799. There have been received since 451 whites and 252 colored, making a total reception of 703.

There have been discharged, removed, eloped and died, 659, leaving on hand September 1st, 1901, 2,595, of whom there are 65 whites and 11 colored on furlough, not discharged.

The average number of patients under treatment during the year was 2,573, while the total number receiving treatment was 3,254.

It will be seen that the average number receiving treatment was 78 more than last year. We have 44 more patients on hand than at the close of last year.

The following tables will give in detail the movement of both white and colored population:

## STATEMENT—WHITE.

In relation to the number of white patients during the past year, or from September 1st, 1900, to September 1st, 1901.

There were patients on hand September 1st, 1900 . . . . . 1,752

White Male Lunatics . . . . . 696

White Male Epileptics . . . . . 99

White Male Idiots . . . . . 40—835

White Female Lunatics . . . . . 822

White Female Epileptics . . . . . 62

White Female Idiots . . . . . 33—917—1,752

There have been received during the year:

White Males . . . . . 241

White Females . . . . . 210 . . . . . 451

Total number of whites under treatment . . . . . 2,203

Of whom there have been

Discharged restored . . . . . 178

Discharged improved . . . . . 10

Discharged harmless, incurable . . . . . 28

Discharged eloped . . . . . 5

Discharged removed . . . . . 9

Discharged not insane . . . . . 1

Eloped not insane . . . . . 1—232

There have died

White Males . . . . . 83

White Females . . . . . 66—149— 381

Leaving on hand September 1st, 1901 . . . . . 1,822

## CLASSIFICATION OF THE WHITES.

White Male Lunatics . . . . . 709

White Male Epileptics . . . . . 109

White Male Idiots . . . . . 41—859

White Female Lunatics . . . . . 869

White Female Epileptics . . . . . 64

White Female Idiots . . . . . 30—963—1,822

Of the white males there have died from apoplexy 2, paresis 2, enteritis, chronic 1, pneumonia 2, epilepsy 20, nephritis, chronic 4, asthenia 18, senility 5, hemorrhage from bowels 1, capillary bronchitis 1, traumatic erysipelas 1, brain disease, organic 13, dysentery 3, cerebral softening 2, asthenia, acute 1, perforation of bowels 1, asphyxia traumatic 1, pernicious anaemia 1, typhoid fever 1, heart disease, organic 1, pulmonary tuberculosis 1, enteritis, acute 1.—Total 83.

Of the white females, ulcer enteric 1, ulcer gastric 1, tuberculosis 10, epilepsy 9, uraemia 1, apoplexy 3, senility 3, intussusception 1, carcinoma 2, nephritis, chronic 3, asthenia 2, suicide 1, neurasthenia 6, lagrippe 6, tubercular meningitis 1, embolism 1, enteritis, chronic 2, pneumonia 1, heart disease, organic 4, asphyxia 1, cystitis 1, brain disease, organic 1, pyaemia 2, dysentery 1, perforation of bowels, traumatic 1, enteritis 1.—Total 66.

## STATEMENT—COLORED.

In relation to the number of colored patients during the past year, or from September 1st, 1900, to September 1st, 1901.

There were patients on hand September 1st, 1900	799
Colored Male Lunatics . . . . .	321
Colored Male Epileptics . . . . .	64
Colored Male Idiots . . . . .	8—393
Colored Female Lunatics . . . . .	365
Colored Female Epileptics . . . . .	29
Colored Female Idiots . . . . .	12—406— 799
There have been received during the year:	
Colored Males . . . . .	136
Colored Females . . . . .	116
	<hr/> 252
Total number under treatment . . . . .	1,051
Of whom there have been	
Discharged restored . . . . .	84
Discharged improved . . . . .	3
Discharged eloped . . . . .	3
Discharged harmless, incurable . . . . .	8— 98
There have died	
Colored Males . . . . .	92
Colored Females . . . . .	88—180— 278
	<hr/>
Leaving on hand September 1st, 1901 . . . . .	773

## CLASSIFICATION OF THE COLORED.

Colored Male Lunatics.. . . . .	343
Colored Male Epileptics . . . . .	32
Colored Male Idiots.. . . . .	9—384
Colored Female Lunatics . . . . .	350
Colored Female Epileptics.. . . . .	21
Colored Female Idiots . . . . .	8—389— 773

Of the colored males who have died there were of heart disease, organic 13, pulmonary tuberculosis 18, maniacal exhaustion 14, epilepsy 18, marasmus 9, senility 5, brain disease, organic 6, cerebral softening 2, anaemia 1, paresis 2, apoplexy 1, nephritis, chronic 3.—Total 92.

Of the colored females, senility 11, nephritis, chronic 3, pulmonary tuberculosis 16, pneumonia, tubercular 1, maniacal exhaustion 6, epileptic shock 4, cardiac paralysis 2, cerebral concussion 1, enteritis, chronic 8, epilepsy 3, marasmus 4, miliary tuberculosis 1, general tubercular infection 2, uraemia 2, heart disease, organic 4, syphilis 1, asthenia 3, dysentery, acute 1, enteritis, acute 6, tubercular phyringitis 1, cirrhosis of liver 1, typhoid fever 1, tubercular enteritis 2, status epilepticus 1.—Total 88.

## TRIBUTE.

It is with deep sorrow and regret that we have to record the death of two of the Trustees of this institution within the past twelve months—Drs. William Duncan, of Savannah, and R. B. Nisbet, of Eatonton. They were high-toned, courtly, intelligent, Christian gentlemen, true to every conviction of duty, and full of all of the dictates of humanity. Their true and unselfish lives were given to ameliorating the condition of suffering humanity. They discharged the duties of their sacred trust as Trustees of this institution with inflexible zeal and fidelity, regardless of circumstances or surroundings. They lived well and died well; hence, the good influence of their noble lives will live on and forever. I thank God that it was my privilege to have known them so long and intimately.

## OCCUPATION AND AMUSEMENTS.

We have endeavored in every way possible, with the means at our command, to give the necessary employment and amusements to all patients whose mental and physical condition would justify it, firmly believing that they are important factors in restoring to full and complete mental and physical health. Employment and diversion should begin as soon as there are decided indications of mental and physical improvement. Of course this employment should be of a suitable character. At this period I regard it as of vital importance that the mind should be diverted by giving some congenial employment if we

hope to hasten recovery, and any neglect at this time of the necessary employment might be the means of a hopeful case drifting into a chronic and incurable condition.

For a large number of men under our care the farm and garden, grading, etc., furnishes a most healthful outdoor exercise and employment; hence, during the past year we have established two colonies—one for the whites and one for the negroes, and so far both have proven very satisfactory indeed, and their beneficial influences will not only be seen in the mental and physical improvement of the patients, but they will be better satisfied and happier, and we will perhaps have far less use for hypnotics, narcotics, etc., in producing quiet and sleep. From our experience occupation on the farm, grading, laundry, sewing room, repair shops, working on lawns, and at the dairies not only furnish healthful occupation, but is beneficial in restoring curable cases, and ameliorating the condition of the chronic and incurable. In my judgment the day is not far distant when it will be the policy of all hospitals for the insane, if possible, to establish working colonies separating the working classes from those who are not able to work, or are not disposed to engage in any occupation.

No treatment for a large number of the insane will give better results mentally and physically than judicious occupation. We can readily appreciate the importance of regular and systematic employment to produce contentment, happiness and health. Lincoln in his work on "Sanity of Mind" says, "No feature of modern asylum treatment has proven of greater value than the introduction of occupation for the insane. One need not seek for better testimony for the virtue of occupation as a mental tonic, or, in other words, the necessity of outlet for one's gifts."

I would respectfully suggest for your consideration the advisability of putting up two one-story frame buildings at the colony in the Piney Woods now occupied by the negroes, to accommodate at least 200 patients, which will enable us to give employment on the farm to a much larger number, and which will not only be beneficial to their mental and physical health, but will enable us, with favorable seasons, after next year to reduce the per capita cost for support and maintenance by rais-

ing perhaps all the corn, oats, peas, potatoes, etc., that we may need, and cotton enough to make all the mattresses that may be needed for the entire institution.

We erected at this colony one five room cottage—four rooms 16x16, and one room 12x16; one two-story barn 51x20.6, and one dormitory 102x31. The erection of these buildings was let out by contract for \$354.75, we furnishing all the material. The lumber was all sawed on the lands of the Sanitarium, and in my judgment, for health, we could have no better arrangement for a large class of the colored insane. The dormitory is divided into three departments—dining room and kitchen. The dormitory department has 40 beds, and the patients go down Monday morning and remain until Saturday evening. They are apparently a happy, contented and healthy set. All of this work has been done since February last, and the land cleared and put into cultivation. I would be glad to have the entire Board go down and see what has been done at this colony, and the character of buildings put up at such a small expenditure; and consider the outlook there as to future developments.

Dr. J. M. Whitaker, First Assistant Physician, who has had charge of the amusements for years for the diversion of the patients, continues to serve in that capacity with the same earnestness and fidelity which has always characterized his efforts in giving as much pleasure and diversion to the patients as possible, and there can be no doubt as to the good influence of these diversions in breaking the monotony of hospital life and promoting contentment and happiness. I wish we had the means at our command to diversify our amusements and employment, and no doubt the results would be more beneficial. Congenial employment and diversified amusements are substitutes for restraints and seclusion, and, to a large extent, narcotics and hypnotics.

#### RECOVERIES.

The per cent. of recoveries based upon the number received during the year, from September 1st, 1900, to September 1st, 1901, is 46.9. While it is a little less than last year, when you take into consideration that of the 703 patients received during

the year there were 245 suffering from chronic or organic brain disease, and in all probability incurable cases, many of whom were paralytics, epileptics and senile imbeciles, simply to be cared for with no hope of cure or improvement, the percentage of recoveries is highly satisfactory, and will compare favorably with former years and similar institutions. It is a great misfortune that this class of the afflicted should be emptied in upon us to the exclusion of curable and hopeful cases. Indeed it is almost impossible to get a correct history of many of the cases before being sent to the Sanitarium, and under the law, if we have a vacant room we are compelled to receive them. It is very evident that we need some legislation in regard to the class of patients that should be received. Just so long as we receive this class we will be overcrowded, and the mortality will increase from year to year in proportion to the increase of this class. The recoveries will also necessarily diminish at the same rate. As the records will show, nearly all those that recover are cases that have been insane less than twelve months.

The general health of the patients has been good when we take into consideration the overcrowded condition of the Sanitarium, and that we have had under treatment during the past year 3,254 patients. Every available space in the Sanitarium has been occupied. Many single rooms that were intended for one patient each now have from two to three patients in them, and we have only been able to receive patients as vacancies might occur.

We have had some cases of fever and some cases of influenza on some of the wards—as a general thing of a mild type. Many of the cases received during the year were feeble and emaciated, suffering from malnutrition and exhaustion from a constant state of mental and muscular excitement, and quite a number had been confined in the jails throughout the State. You can readily see that there is nothing to justify us in the hope of the recovery of such cases. Quite a large per cent. could not be examined on account of their feeble condition. Many were carried to the wards on litters, living but a short while after reception.

As to the alarming per cent. of tuberculosis with the colored insane, this fatal disease will be found more or less prevalent in

all institutions for the insane, especially in overcrowded institutions.

We have used every precaution possible to check the spread of this malady, but with no decided success, and we can only repeat what we have stated in our last report in regard to combating successfully the spread of tuberculosis in the Sanitarium, and that is to have a building detached from the main building, with good hygienic surroundings, and every suspect promptly removed to this building. You will see by reference to the mortality tables that most of the deaths were from incurable diseases, and by reference to the report of the Pathologist it will be seen that 48 per cent. of the cases examined were tubercular.

#### CONVICT INSANE.

I am still firmly of the opinion that it is an outrage that the ordinary insane should be forced, on account of disease, to associate with the worst class of criminals. I regard it as a cruel wrong to both classes. This has been an annual appeal for years, but with no avail, and I simply refer to it again because I feel it my sacred duty to do so, and with the hope that some humanitarian in the General Assembly will see the justice of my appeal, and make an effort to correct it.

#### PATHOLOGICAL LABORATORY.

You will see from the report of Dr. Perry, the faithful and efficient Pathologist, the important work that is being done in that department. You will also see that the principal lesions with the insane are nephritis, gross lesions of the kidneys, tuberculosis, valvular disease of the heart, and gross lesions of the arteries, which are the most important of all with the insane.

The laboratory is now very well equipped for reliable investigations.

#### TRAINING SCHOOL.

The training school for the past year has continued as usual under the supervision of Miss Cross, Superintendent of Nurses. Miss Cross deserves much credit for the interest she has taken in the school, and the good influence of it can be seen and felt throughout the entire female department.

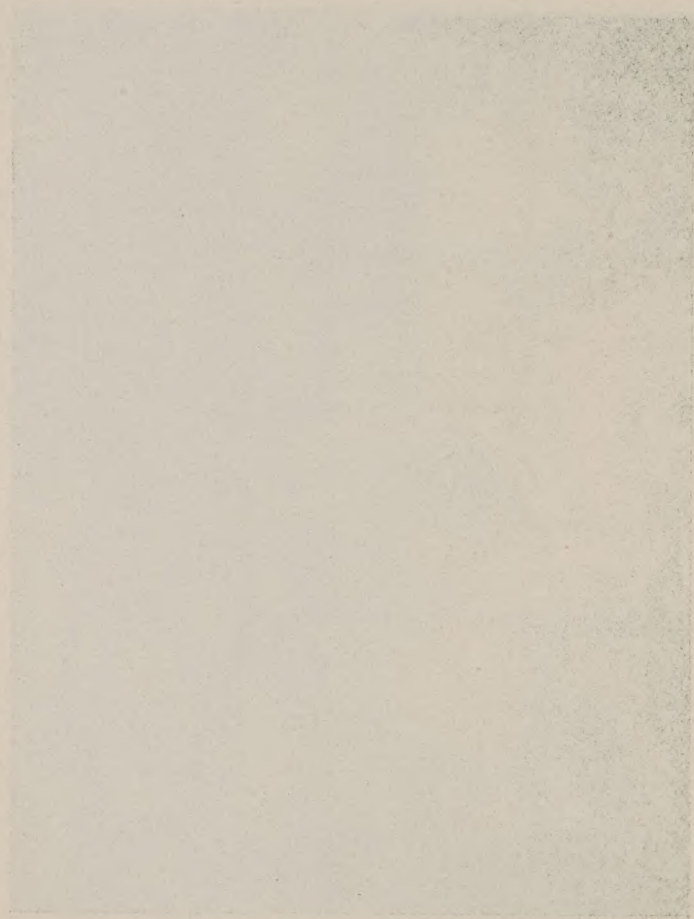

COLONY FOR WHITE MALES.

COLONY FOR WHITE MALES.

## IMPROVEMENTS AND REPAIRS.

By reference to the Engineer's report you will see that there has been much more done this year than last year in the way of improvements, repairs, painting, etc. The operating room for the white department, soon to be completed, will fill a long needed want in the institution. The Engineer's report will give you a detailed account of all improvements and repairs that have been made during the past year—many of which are very important.

## FINANCES.

By reference to the report of our faithful and efficient Steward a detailed account of the management of that department for the past twelve months will be shown, and that the finances of the institution continue to be economically managed. The per-capita per diem is 30.29, which I regard as a remarkably good showing when you take into consideration the advance in all supplies for subsistence that are used by the Sanitarium, and the large amount of repairs, painting and improvements that have been done during the past year.

## ASSISTANT STEWARD.

The report of the Assistant Steward will give you an itemized statement of the results of the garden, farm and dairies, and the amount of pork raised the past year. We were very unfortunate with the hogs this year; quite a number died from cholera. We, however, saved 56,845 lbs. of pork after having lost 86 large hogs and 149 pigs from the dreadful disease, which of course increased our expenses in the way of subsistence. The clear profits, however, from these departments make a very favorable showing.

## STOREKEEPER.

By reference to the report of the Storekeeper you will see a detailed account as to the conduct and management of that department for the fiscal year of this institution.

## MATRON.

The Matron's report will show an itemized statement of the work done in that department in making and repairing all clothing and bedding of the entire institution during the year. Also the amount of canned fruit, preserves, pickles, etc., put up for winter use.

## APOTHECARY.

It gives me great pleasure to state that the pharmaceutical preparations manufactured by our efficient pharmacist has been a great saving to the institution. You will see by reference to his report what saving has been made. He is efficient and attentive to his duties.

## DENTIST.

The report of the Dentist, Dr. Reid, will show the amount and character of work done by him during the fiscal year. Dr. Reid has been patient, faithful and attentive to his duties.

## ACKNOWLEDGEMENTS.

I am very grateful to the many friends of the institution for the generous donations of books, papers, periodicals, etc., for the Sanitarium library for the use of patients. The report of the Librarian will give a list of all books and periodicals on hand, and those that have been contributed during the year, and the names of the contributors as far as possible.

## ATTENDANTS AND EMPLOYEES.

It is with pleasure I acknowledge the faithful service rendered by the attendants and employees as a general thing. Their duties at times are trying. The good influence of the training school can be seen on every ward.

## RELIGIOUS SERVICES.

Religious services have been held regularly on Thursday and Sunday evenings by our Chaplain, Rev. D. W. Brannen, when

the weather would permit. The attendance upon the services has generally been large, and deportment good, and the services apparently edifying. The Chaplain has attended all calls to bury the dead and visit the sick.

OFFICERS.

I am profoundly grateful for the interest that the officers have shown in the discharge of their respective duties, and to all who have aided me in any way in the discharge of my duties.

TRUSTEES.

To you, gentlemen of the Board, I am grateful for the many acts of kindness and support given me, and your wise counsel in all matters pertaining to the welfare of the Sanitarium and its patients.

We begin the duties of another year trusting in an all wise Providence for light and guidance.

Very respectfully submitted,

T. O. POWELL,  
Superintendent.

## REPORT OF PATHOLOGIST.

---

Georgia State Sanitarium,

September 1, 1901.

Dr. T. O. Powell, Superintendent.

Dear Sir: I herewith present a report of the work done in the pathological department during the year ending Aug. 31, 1901. The work has been continued, in general, along the same lines pursued last year. The only changes from this have been such as would tend to more fully develop the clinical features and thus bring the laboratory in closer touch with the wards. A smaller number of autopsies has been done, therefore, than was reported last year. The work in urinalysis, however, has been more than doubled, and a considerable amount of miscellaneous work, including blood examinations and bacteriological work, has been done which does not appear in the tables below:

TABLE No. 1.

## SYNOPSIS OF AUTOPSIES.

Case No.	Race	Sex	Age	Mental Disease	Duration	Section Hours After death	ANATOMICAL DIAGNOSIS.
177	C	F	60	Mania, chronic.	10 yrs.	16	Fracture at base of skull. Oedema of pia mater. Cerebral apoplexy. Chronic nephritis. Chronic endarteritis.
178	C	F	25	Epilepsy.	1 yr.	5	Pulmonary tuberculosis. Tubercular pleurisy with effusion. Chronic valvular disease of heart. Chronic endarteritis. Fatty degeneration of liver. Chronic nephritis.
179	C	F	65	Dementia, terminal.	5 yrs.	50 min.	Thickening and adhesion of dura mater. Oedema of pia mater. Chronic endarteritis. Chronic nephritis.
180	C		70	Dementia, senile.	1½ yrs.	1½	Thickening and adhesion of dura mater. Oedema of pia mater. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
181	C	M	40	Mania, chronic	14 yrs.	1	Oedema of pia mater. Pulmonary tuberculosis. Tubercular infiltration of spleen. Chronic endarteritis.
182	C	M	68	Epilepsy.	Several years.	1	Thickening and adhesion of dura mater. Congestion of pia mater. Pulmonary emphysema. Hypostatic pneumonia. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
183	C	M	35	Mania, epileptic.	3 yrs.	4½	Thickening and opacity of pia mater. Cystic degeneration of pineal gland. Pleuritic adhesions. Chronic nephritis. Chronic endarteritis.
184	C	F	40	Epilepsy,	Number of years.	5	Chronic nephritis.
185	C	M	40	Mania, chronic.	11 yrs.	4	Oedema of pia mater. Pleurisy with effusion. Pulmonary tuberculosis. Chronic endarteritis.
186	C	M	52	Mania, acute.	6 wks.	1	Pleuritic adhesions. Hypostatic pneumonia. Fatty degeneration of liver. Fatty degeneration of heart. Chronic endarteritis.
187	C	M	4	Mania, acute.	8 mos.	45 min.	Oedema of pia mater. Pleuritic adhesions. Fatty degeneration of liver. Chronic nephritis. Chronic endarteritis.
188	C	M	21	Mania, chronic.	21 mo.	3.	Oedema of pia mater. Pulmonary tuberculosis.

TABLE No. 1.—Continued.

## SYNOPSIS OF AUTOPSIES.

Case No.	Race	Sex	Age	Mental Disease	Duration	Section Hours after death	ANATOMICAL DIAGNOSIS.
189	C	F	30	Mania, acute.	4½ mo	2	Oedema of pia mater. Pulmonary tuberculosis. Fatty degeneration of heart. Chronic endarteritis. Chronic nephritis.
190	C	F	29	Dementia, terminal.	4 yrs.	1½	Subdural hemorrhage. Oedema of pia mater. Fatty degeneration of liver. Fatty degeneration of heart. Chronic endarteritis.
191	C	F	40	Mania, chronic.	10 yrs.	1½	Pulmonary tuberculosis. Fatty degeneration of liver. Fatty degeneration of heart. Chronic endarteritis.
192	C	M	40	Epilepsy.	Unknown	1½	Suppuration of frontal sinus. Thickening of dura mater. Subdural hemorrhage. Tumor of dura mater. Tubercular pleuritis with effusion. Chronic valvular disease of heart. Chronic endarteritis. Chronic nephritis.
193	C	F	47	Mania, chronic.	2 yrs.	50 min.	Pulmonary tuberculosis. Tubercular pleurisy with effusion. Chronic valvular disease of heart. Cirrhosis of liver.
194	C	F	35	Mania, chronic.	2 yrs.	1¾	Pulmonary tuberculosis. Chronic nephritis. Chronic endarteritis.
195	C	F	65	Dementia, senile.	5 yrs	1	Thickening and adhesion of dura mater. Oedema of pia mater. Pulmonary tuberculosis. Fatty degeneration of liver. Chronic valvular disease of heart. Chronic nephritis. Chronic endarteritis.
196	C	M	50	Mania, chronic.	1 yr.	1½	Extra dural hemorrhage. Oedema of pia mater. Fatty degeneration of liver. Chronic nephritis. Chronic endarteritis.
197	C	F	35	Dementia, terminal.	13 yrs.	1¼	Congestion of kidneys.
198	W	M	55	Mania, chronic.	20 yrs	1	Intestinal perforation with diffuse peritonitis. Chronic nephritis.
199	C	M	30	Dementia, terminal.	Unknown	2½	Pulmonary tuberculosis. Fatty degeneration of heart. Chronic nephritis. Chronic endarteritis.

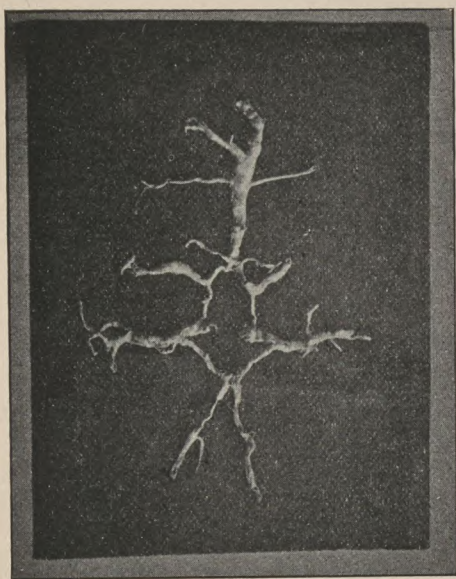

TABLE No. 1.—Continued.

## SYNOPSIS OF AUTOPSIES.

Case No.	Race	Sex	Age	Mental Disease	Dura- tion	Section Hours After death	ANATOMICAL DIAGNOSIS.
200	C	F	53	Mania, chronic.	8 yrs.	45 min.	Thickening of dura mater. Pulmonary tuberculosis. Tubercular pleurisy. Fatty degeneration of heart. Chronic valvular disease of heart. Tubercular infiltration of liver and spleen. Chronic nephritis. Chronic endarteritis.
201	C	M	50	Paresis.	Sev- eral years.	1½	Thickening and adhesion of dura mater. Congestion of pia mater. Cerebral softening. Pleuritic adhesions. Infarct of liver. Chronic nephritis. Chronic endarteritis.

PLATE I.

Arteries at the base of brain showing extensive deposits of atheroma  
and multiple aneurisms.

## POST-MORTEM EXAMINATIONS.

During the year twenty-five sections have been made. The cases have been, for the most part, selected as such as might be expected to show some interesting features, and include a number of different forms of mental disease. In this part of the work, and especially, in examinations of the nervous system, the greatest possible care has been taken to exclude errors which might occur from faulty technique or post-mortem changes. In this connection attention is called to the fact that in all cases in which the cortex has been examined the autopsy was done in a short while after death. In no case was the intervening time more than five hours and in nearly 80 per cent. of the cases it was less than two hours. The importance of using only fresh material cannot be overestimated for, especially in neuropathology, it is only from such cases that we can expect reliable results.

## CHRONIC NEPHRITIS.

The cases coming to autopsy during the year have fully borne out the statistics of last year's report in regard to chronic disease of the kidney. From table No. 1. it is seen that 64 per cent. of the number presented were gross lesions of the kidney, while the records of microscopical examinations increase the number showing chronic nephritis to 84 per cent. The pathological changes are very similar in all these cases, being a chronic diffuse type. The three elements of kidney structure, viz.: epithelium, connective tissue and vessels suffered with varying degrees of intensity in all cases. It is with the vascular structure, however, that the most frequent occurrence of serious disease has been found. Arteriosclerosis with fibroid degeneration of the capillary tufts was present in 79 per cent. of all cases examined.

## TUBERCULOSIS.

Of the 25 cases examined post-mortem 48 per cent. have shown tubercular disease. This is a very pronounced increase over the figures of last year, and is, indeed, an alarmingly high

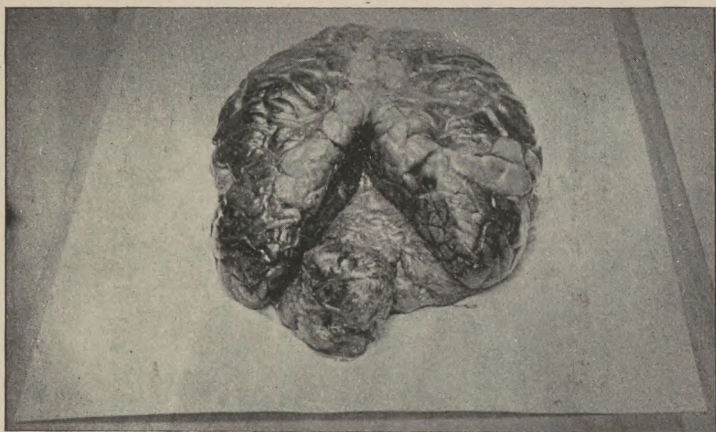

per cent. In only a small number was the tubercular process the immediate cause of death and in several instances this condition was found in so early a stage that it had escaped detection clinically. That a number of these patients had developed the disease since admission to the institution cannot be doubted. I am quite inclined to the opinion that the per cent. shown by our autopsies, high as it is, may be considered as a fair index of the existence of this disease in all our negro patients at the time of death. From these figures it would seem that, despite all efforts to check it, pulmonary tuberculosis is decidedly on the increase in the negro department.

#### DISEASE OF THE CIRCULATORY SYSTEM.

Chronic valvular disease of the heart was found in 28 per cent. of cases. In regards both to frequency of occurrence and importance this condition plays only a secondary role as compared to chronic inflammatory disease of the arteries. This latter process as a gross lesion could be demonstrated in 80 per cent. of my cases, while the records of microscopical examinations show arteriosclerosis of the arteries of the cortex in 60 per cent., and of the kidney in 79 per cent. As pointed out in my report of last year this disease in the insane is not limited to the aged, but is frequently found in comparatively early life. Considering the frequency with which it is found and its wide distribution throughout the body I look upon this as the most important of the general diseases which are found associated with insanity.

PLATE II.

Sarcoma of the pia mater producing pressure upon and some destruction of one hemisphere of the cerebellum. Found in a patient who had given no cerebellar symptoms.

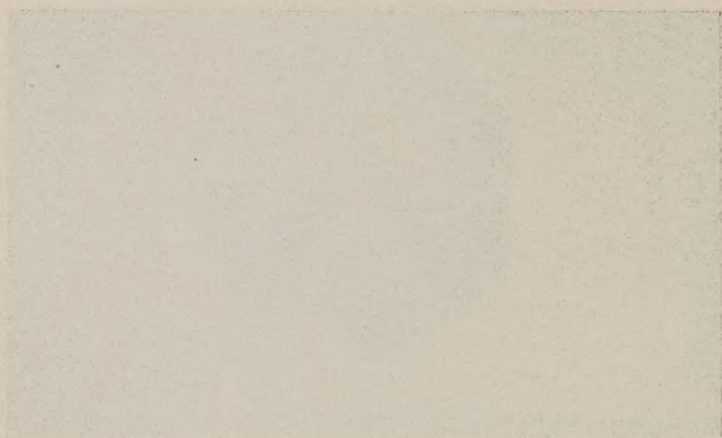

TABLE No. 2. More Important Gross and Microscopical Changes in Brain and Meninges.

Case No.	Race	Sex	Age	Mental Disease	Brain weight gms.	GROSS APPEARANCE	MICROSCOPICAL EXAMINATION.
177	C	F	60	Mania, chronic.	1190	Oedema of pia mater. Tumor of pia mater. Cerebral apoplexy.	Sarcoma of pia mater. Cortex not examined.
178	C	F	25	Epilepsy.	1000	Nothing of special importance.	Considerable brain sclerosis, especially marked in frontal region.
179	C	F	65	Dementia, terminal.	827	Dura mater thickened and adherent to skull. Pia mater oedematous. Left post. Communicating artery rudimentary. Atrophy of convolutions.	Marked sclerosis of ganglion cells. Considerable cell destruction. Vessels of cortex tortuous and thickened.
180	C	M	70	Dementia, senile.	1212	Dura mater thickened and adherent. Pia mater oedematous. Atrophy of convolutions.	Marked pigmentation and fatty degeneration of ganglion cells. Some acute degeneration and some sclerosis. Vessels thickened.
181	C	M	40	Mania, chronic.	1315	Pia mater oedematous.	Considerable pigmentation of ganglion cells. Slight amount of acute parenchymatous degeneration. Vessels thickened.
182	C	M	63	Epilepsy.	1362	Dura mater thickened and adherent. Pia mater congested. Atrophy of convolutions.	Marked sclerosis and considerable destruction of ganglion cells. Some pigmentation. Vessels slightly thickened.
183	C	M	33	Epilepsy.	1145	Pia mater thickened. Cystic degeneration of pineal gland.	Marked sclerosis and destruction of ganglion cells. Considerable chromatolysis in large motor cells. Vessels thickened.
184	C	F	40	Epilepsy.	1270	Pia mater slightly congested.	Considerable cell sclerosis.
185	C	M	40	Mania, chronic.	1192	Oedema of pia mater. Cerebral congestion.	Extensive fatty, pigmentary and sclerotic changes in the ganglion cells.
186	C	M	52	Mania, acute.	1230	Convolutions extremely irregular in arrangement.	Extensive acute parenchymatous degeneration of the ganglion cells. Some pigmentation.

TABLE No. 2—Continued.

Case No.	Race	Sex	Age	Mental Disease	Brain weight gms.	GROSS APPEARANCE	MICROSCOPICAL EXAMINATIONS.
187	C	M	45	Mania, acute.	1240	Oedema of pia mater. Convolutions quite irregular in arrangement.	Slight amount of acute degeneration and pigmentation. Vessels thickened. Perivascular spaces infiltrated.
188	C	M	21	Mania, chronic.	1222	Oedema of pia mater. Convolutions extremely irregular. Slight atrophy.	Marked sclerosis and destruction of ganglion cells.
189	C	F	30	Mania, acute	1070	Pia mater slightly oedematous. Convolutions very irregular in arrangement.	Considerable acute parenchymatous degeneration. Some cell sclerosis. Vessels thickened. Perivascular spaces infiltrated.
190	C	F	29	Dementia, terminal.	935	Subdural hemorrhage. Oedema of pia mater. Atrophy of convolutions.	Sclerosis and destruction of ganglion cells.
191	C	F	40	Mania, chronic.	1037	Slight atrophy.	Extensive acute parenchymatous degeneration. Considerable cell sclerosis.
192	C	M	40	Epilepsy.	1270	Dura mater thickened. Subdural hemorrhage. Tumor connected with dura. Convolutions irregular and atrophied.	Tumor a well organized clot. Slight sclerosis with marked pigmentation. Vessels thickened.
193	C	F	47	Mania, chronic.	1054	Convolutions irregular in arrangement.	Small amount of acute parenchymatous degeneration. Considerable sclerosis.
194	C	F	35	Mania, chronic.	1080	Slight atrophy of convolutions.	Marked sclerosis of ganglion cells. Slight acute parenchymatous degeneration. Vessels thickened and tortuous.
195	C	F	65	Dementia, senile.	998	Dura mater thickened and adherent. Pia mater oedematous. Convolutions irregular and atrophied.	Marked pigmentation of ganglion cells. Vessels thickened and tortuous.
196	C	M	56	Mania, chronic.	1185	Extra dural hemorrhage. Oedema of pia mater. Left vertebral artery very small.	Ganglion cells not examined. Vessels much thickened. Perivascular spaces infiltrated with round cells.

TABLE No. 2—Continued.

197	C	F	35	Dementia, terminal.	1030	Pia mater congested. Left post Communicating a tery very smali.	Slight sclerosis and excessive pigmentation of ganglion cells.
198	W	M	55	Mania, chronic.		Complete autopsy not made.	
199	C	M	30	Dementia, terminal.	979	Slight atrophy of convo'utions.	Considerable sclerosis of ganglion cells. Vessels are thickened and irregular in caliber.
200	C	F	53	Mania, chronic.	1020	Dura mater thickened and adher- ent. Convolutions irregular in ar- rangement and atrophied.	Pronounced sclerosis and pigmentation of ganglion cells. Vessels thickened. Perivascular spaces infil- trated with round cells.
201	C	M	50	Paresis.	1280	Dura mater thickened and ad- herent. Pia mater congested. Softened area in occipital region.	Considerable sclerosis and pigmentation of ganglion cells. Vessels thickened.

## THE CORTEX.

The morbid processes found in the cortex have been essentially degenerative in character. In the ganglion cells the most frequently found pathological condition has been sclerosis. This was present in all cases of a chronic nature regardless of their clinical classification. It is a chronic degenerative process and is accompanied in many cases of long standing by a certain amount of cell destruction. In some cases, especially in the senile insanities, extreme pigmentation has been found. In the acute forms many cells show acute parenchymatous degeneration.

Attention has been already called under another head to the existence of vascular disease in the cortex.

TABLE NO. 3.

Synopsis of analysis of urine of patients on admission.

	No. of Cases.	Per cent. of Cases.
Number of specimens examined . . . . .	324	

## CRYSTALLINE SUBSTANCES FOUND.

Amorphous and crystalline urates present in . . . . .	37	11.4

PLATE III.

### EXPLANATION OF PLATE III.

Fig. 1. Ganglion cell in early stage of acute parenchymatous degeneration. Cell body is swollen. Nucleus swollen and eccentrically placed. Chromatolysis present but some Nissl bodies are still to be seen.

Fig. 2. More advanced degeneration than Fig. 1. Cell body becoming slightly angular. Nucleus irregular in shape and eccentrically placed. Chromatolysis marked.

Fig. 3. Sclerosis of ganglion cell. Cell stains deeply and diffusely. It is shrunken in size. Nucleus small and stained.

Fig. 4. Ganglion cell stained by Golgi method. Degeneration shown by nodular state of some processes and a diminution of gemmulae.

Fig. 5. Ganglion cell. Golgi stain. In advanced stage of degeneration.

Drawings of Figs. 1, 2 and 3 made from sections stained after Nissl. Cam. luc. Objective 1-12. Ocular 2 in.

Drawings of Figs. 4 and 5. Cam. luc. Objective 1-6. Ocular 2 in.

### CLINICAL LABORATORY WORK.

During the year 632 specimens of urine have been examined chemically and microscopically. Above can be seen in tabulated form the result of the examination of the urine of 324 new patients at the time of admission. As compared with the tables in last year's report there are some differences which require explanation. The smaller per cent. of indicanuria is due to the fact that in the report of last year all cases showing even a small trace of indican were included, while this year I have tabulated only those which showed indican well marked. The cases giving evidence suggestive of kidney disease have been classified somewhat differently this year. Only those showing tube casts in connection with albumin or kidney epithelium have been classed as cases of nephritis, while a considerable number showing casts alone have been excluded from this table. In this connection attention is called to the 3rd division of table No. 3. From this table can be seen the irregularity which exists in the relationship of casts and albumin in the urine. A considerable

number of cases showed albumin in the urine without the presence of casts, and 20 per cent. of the specimens examined showed the presence of casts without albumin. These facts have been recorded only after repeated and various tests have verified the result. I am led to believe that among the insane there is an unusually high per cent. of cases whose urine contains simple hyaline casts without other evidence of kidney disease.

A considerable amount of clinical work, including blood examinations, examinations of sputum, tests for the Widal reaction, etc., has, because of its miscellaneous nature, not been presented in tabulated form.

In conclusion let me express the hope that in the future the laboratory may be brought in even closer touch with the active clinical work of the wards, for I feel that in this direction lies its greatest field of usefulness.

I wish to acknowledge my indebtedness to you for a continuation of interest and assistance, and to Dr. J. W. Mobley for much work done in the laboratory.

Respectfully,

M. L. PERRY, M. D.,  
Pathologist.

## REPORT OF TREASURER.

Georgia State Sanitarium,  
Milledgeville, Ga., Sept. 1st, 1901.

Dr. T. O. Powell, Supt.,

Georgia State Sanitarium.

My Dear Sir: I have the honor to submit herewith my annual report for the fiscal year commencing September 1st, 1900, and ending August 31, 1901.

Yours very truly,

MILLER G. BELL, Treasurer.

Aug. 31. By expenditures . . . . . \$5,059 52

## REPORT OF STEWARD.

---

Georgia State Sanitarium,

August 31st, 1901.

Dr. T. O. Powell, Supt., etc.

Dear Sir: I have the honor to transmit through you to our honorable board of trustees, this, my report as Steward, from Sept. 1st, 1900, to Sept. 1st, 1901.

Abstract "A" shows the balance brought forward from last fiscal year, the amount drawn from the State Treasurer for the support and maintenance of the Sanitarium, together with a classified statement of the disbursements; also the balance on hand to be carried forward to the next year.

Abstract "B" shows the expenditures in detail on account of subsistence.

Abstract "C" shows the expenditures in detail on account of clothing.

Abstract "D" shows the expenditures in detail on account of fuel and transportation.

Abstract "E" shows salaries paid to officers.

Abstract "F" shows wages paid to employees.

Abstract "G" shows in detail the expenditures on account of incidental expenses.

Abstract "H" shows in detail the expenditures on account of medical supplies.

Abstract "I" shows in detail the expenditures on account of contingencies.

Abstract "J" shows in detail the expenditures on account of stationery and postage.

Abstract "K" shows in detail the expenditures of the balance of the insurance fund for repairing building for colored insane.

Abstract "L" shows in detail the expenses of the special appropriation for erecting new buildings and for other purposes.

Abstract "M" shows the requisitions for support and maintenance of the Sanitarium drawn from the State Treasurer in their regular order.

Abstract "N" shows the average number of patients from 1873 to 1901, both included, together with the per capita per diem and per annum.

Abstract "O" shows the cost of maintaining one patient by the year, month, week and day.

Our Storekeeper, Mr. W. H. Hunter, reports stock on hand \$11,344.78.

Our Apothecary, Mr. T. R. Thornton, reports stock on hand \$1,903.63.

Our per capita is .30 29-100 cents.

By reference to the report of Mr. George W. Hollinshead, Assistant Steward, you will see the results from farm, garden, dairies, hogs, etc., etc., also a report of stock, wagons, utensils and implements on hand.

I have availed myself of all discounts allowed for cash, amounting to several hundred dollars.

As has always been the custom, all barrels, sacks, tar, etc., etc., have been disposed of, and amounts realized from sale of such transferred to "petty cash" and expended in purchasing country produce.

Our per capita is a little in excess of last year, due to failure of mines to ship coal promptly last year, thereby throwing \$5,600.00 of last year's coal supply into this year. We have also established a colony for colored males in the Piney Woods at considerable expense, and the increase in cost of supplies has also effected our per capita. Duplicate vouchers of the expenditures, accompanied by the required certificate approved by yourself and audited by the trustees, have been filed monthly, as required by law, in the Executive Department in Atlanta. I have devoted, as required by the rules of the Institution, my entire time to the Steward's work, and have discharged, to the best of my ability, the duties required of me. I feel deeply grateful for the confidence of our board of trustees, as well as that of yourself. I am,

Very respectfully,

LUCIUS J. LAMAR,

Steward, G. S. S.

## ABSTRACT "A."

Statement of Steward, Georgia State Sanitarium, showing the balance brought forward from last fiscal year, and all money received; also a classified statement of disbursements from September 1st, 1900, to September 1st, 1901.

REPORT OF ASSISTANT STEWARD.

---

Georgia State Sanitarium,

Near Milledgeville, Ga., Sept. 1st, 1901.

Mr. L. J. Lamar, Steward.

Dear Sir: I herewith hand you my report as Assistant Steward for the year beginning September 1st, 1900, and ending with August 31st, 1901, of the Old and New Dairies, Garden, Farm, Pork and Transportation.

Also statement of Stock, Wagons, etc., on hand Sept. 1st, 1901.

Our Piney Woods Farm does not make much show in this report as the main crops are yet growing in the field.

Our fall garden crops are fairly good.

We have lost since our last report, from unknown causes, 235 head of hogs and pigs—86 large hogs and 149 pigs. The loss of the pigs will make us short of pork this winter as they would have been our large hogs.

We have also lost at the two dairies nine milch cows, two heifers and one young steer.

Very respectfully, etc.,

GEO. W. HOLLINSHEAD,

Assistant Steward.

## OLD DAIRY.

Cr.

By sweet milk, gallons 34,489 3-4 at 18c. . . . .	\$6,208 15

## REPORT OF DENTIST.

Georgia State Sanitarium,

Dental Department,

September 1st, 1901.

Dr. T. O. Powell, Superintendent.

Dear Doctor: The following is a report itemizing the Dental Treatment and Operations I have done during the year ending September 1st, 1901.

Alveolar Abscesses treated . . . . .	81
Facial Neuralgia treated . . . . .	56
Periodontitis treated . . . . .	28
Stomatitis treated . . . . .	28
Pyorrhoea Alveolaris treated . . . . .	107
Acute Odontalgia treated . . . . .	92
Calcareous deposits removed, number of patients . . . . .	120
Pulps Devitalized, removed and cavities and pulp canals filled . . . . .	54
Putrescent Pulps removed, tooth treated, cavities and pulp canals filled . . . . .	33
Cavities filled with Oxphosphate Zinc . . . . .	274
Cavities filled with Amalgam . . . . .	167
Cavities filled with Gold . . . . .	3
Artificial Dentures made . . . . .	2
Artificial Dentures repaired . . . . .	4
Hypersensitive teeth from erosion or attrition cauterized with Nitrate of Silver . . . . .	40
Teeth cleaned, number of patients . . . . .	153
Teeth and roots badly decayed, ulcerative and offensive, extracted . . . . .	452
Number of patients during the year . . . . .	678

REMARKS:—Dental material bought during the year:

1900, Sept. 17 .. . . .	\$ 4 04
“ “ .. . . .	7 54
“ Nov. .. . . .	5 26
1901, July .. . . .	2 00
“ Aug. .. . . .	4 74
Total .. . . .	\$23 58

The number of operations and treatments for the year ...2,364

Respectfully submitted,

E. H. REID.

## REPORT OF APOTHECARY.

September 1st, 1901.

Dr. T. O. Powell, Superintendent.

Dear Sir: I present herewith a report of the Apothecary Department for the year ending September 1st, 1901. This being my first annual report I beg to call your attention to the appended list of pharmaceutical preparations made by the Apothecary during the year; these were, with one exception, formerly purchased from the manufacturers, and by referring to the list, in which the comparative cost is given, it will be seen the Institution has been saved a total of \$280.95. This saving is not as great as it will be for the coming year, from the fact that at the time of taking charge of this department, there was on hand quite a quantity of such preparations which, of course had to be used before others were made. In making the preparations it has been my aim to give the Institution a line of Pharmaceuticals of our own manufacture which were thoroughly up to the standard, pharmaceutically, and of equal therapeutic value, and, as will be seen by the list referred to, at a cost much less than that for which the same could be purchased from any reliable manufacturer. I have endeavored to make everything in this line that could be made economically and with the apparatus at hand, but in the case of a few preparations which, in my judgment, the larger manufacturer is better equipped to make, I have bought them at reasonable prices. In the purchase of

drugs and chemicals I have bought them at the lowest prices for which reliable and pure goods could be had, and an inspection of the invoices on file will, I think, support the statement that the prices paid are as low as is consistent with the market, quality of goods considered. I would also call your attention to the fact that the total amount expended for medical supplies for last year, as shown in the report of the Steward, was \$4,086.70, whereas \$2,821.75 covers the expenditures for this year, a difference of \$1,264.95 in favor of the fiscal year just ended. While the reduction of expenses in this department is quite noticeable, there has also been a marked increase in prescription work, 16,438 being the number filled last year, against 19,865 for this year, an increase of 3,427.

## STATEMENT.

Amount of drugs purchased, including wines, whis-  
kies, Dental and Laboratory Supplies and Drug-  
gists' Sundries . . . . . \$2,821 75  
Amount of drugs sold officers and employees . . . . . 210 96  
Amount of drugs on hand . . . . . 1,582 30  
Fixtures and apparatus on hand . . . . . 321 33  
Nnumber of prescriptions filled . . . . . 19,865

## PREPARATIONS MADE BY APOTHECARY.

In conclusion I wish to express my sincere appreciation for your uniform kindness and encouragement in my work.

Respectfully,  
T. R. THORNTON, Ph. G.,  
Apothecary.

## REPORT OF ENGINEER.

---

Georgia State Sanitarium,

Milledgeville, September 1st, 1901.

Dr. T. O. Powell, Superintendent.

Dear Sir: I have the honor to submit herewith my annual report of the workings of this department from September 1st, 1900, to September 1st, 1901.

Respectfully,

T. H. DeSAUSSURE,

Engineer.

---

### IMPROVEMENTS.—HOSPITAL.

The dining hall and kitchen for the Hospital building, which was begun during the last fiscal year, has been completed. This building is a wooden one, 66 ft. 6 in. long by 26 ft. wide. The ten foot wrought iron range has been taken out of the Hospital building and put into the kitchen. The hot water apparatus also, and the kitchen and dining room sinks have been removed from the rear of the building, where they were put up temporarily, and put into the kitchen. A Lotu 4 ft. wood furnace has been placed in the dining room; and six stoves in the Hospital building. These latter have been surrounded by heavy wire guards, with pass locks to the doors. Two water closets and two bath tubs have been added to the plumbing of the second story; and the building connected to the central station by telephone.

### DRY KILN.

The old wooden dry kiln which was used for drying lumber, having become unsafe, and inoperative through decay, a new one has been built of brick, and larger than the old one, to meet

our increasing demand upon it. The kiln is heated by a forced blast of hot air, and is very effective.

#### TIN SHOP.

The old soap house has been fitted up as a tin shop. Some tools have been bought; and all of the repair work of the institution's tin ware, and some new work, is now done by a patient.

#### NEW BOILER.

Boiler No. 1 at machine shop boiler room, having been twenty-eight years in service, and being unfit to stand the increased pressure required of it, has been condemned. It has been taken out and a new one, 54 in. by 16 feet, put in its place.

#### PLUMBING.

All of the plumbing fixtures in the wards 7, 8 and 9 for female patients, have been taken out and their places supplied by modern fixtures. The bath tubs, which are enameled cast-iron, have been placed in separate rooms from the water closets. The water closets, which are also enameled iron, have automatic flushing seats. These closets use water only when they are operated by the weight of the person on the seat, and are much more economical in the use of water than the kind we have been using. The floors of the water closets and bath rooms of the 24th, 25th and 26th female wards have been removed and the tubs reset with new piping. New hoppers and a flushing tank have been put on 15th and 16th female wards.

#### TELEPHONE EXTENSION.

Our central station switch-board has been enlarged by the addition of ten drops and jacks. Three new telephones have been added.

#### CHANGE OF LOCKS.

New tumblers have been bought for sixteen hundred locks, and these have been put into the locks on the wards for white

females. This change makes these locks practically new, and also requires an entirely different key from the old one for their operation.

#### INFIRMARY.

The second male ward has been thoroughly overhauled and fitted up as an infirmary. The walls have been hard-finished and the wood work painted with white enamel. The floors of the rooms are finished with three coats of Berry Bros. liquid granite floor varnish. One of the small dormitories has been fitted up as a dining room and a door cut through the outer wall, making convenient egress to the kitchen.

#### OPERATING ROOM.

A surgical operating room has been built as an annex to the infirmary for females. This is a brick building having one room 18x20 feet for operations, and a smaller room 7 ft. 6 in. x 12 ft. for sterilizing apparatus. In the construction of the room, especial care has been taken to obtain a great quantity of light. This is accomplished by having two sky-lights, one 10x12 feet, the other 3x6 feet; and five plate glass windows, each 3x7 feet. All corners are rounded, so as to enable the attendant in charge to keep the room thoroughly aseptic.

#### GRADING.

The work on the site for the new building has been progressing satisfactorily. We have moved about two-thirds of the quantity of earth necessary, or say, about twenty thousand cubic yards.

#### TREE PLANTING.

Two hundred and thirty-four trees have been planted around the buildings and along the "avenue."

#### STEEL CEILING.

Six hundred and forty-eight square feet of steel ceiling have been put up and decorated in the center building.

## YARD FOR BOYS.

There has been a yard 80x175 feet fenced off near the West Detached building, for the use of the boys, and steps made from the second story to the yard.

## DETACHED BUILDING.

The East detached building has been thoroughly overhauled. Six thousand, six hundred and eighty square feet of rift flooring have been laid, with a quarter round strip nailed to floors around each room and hall way in the building. Much painting has been done also, and two new hoppers put in, and the whole put in first class condition.

## PAINTING.

Three six room cottages have been painted two coats each, and the 2d, 21st and a large part of the 20th male wards have been painted. The old paint from two rooms in the center building has been cleaned off, and the walls and wood work repainted.

## CREMATORY.

A brick furnace has been built near the gas works for burning up the sweepings from around the buildings.

## ANNUNCIATOR.

A twenty-five point annunciator has been put in the main center building and the rooms wired to connect.

## MACHINERY.

The outfit of the wood working shop has been added to by the purchase of a power morticing machine and an improved band saw.

## FLOORING.

Sixteen thousand, nine hundred and forty superficial square feet of rift flooring have been laid.

In addition to the usual amount of ordinary repairs about the buildings, the carpenters have made the following:

25	Dining tables.	6	Breast yokes.
38	Benches.	64	Scrub mops.
70	Window sash.	30	Commodos.
2	Doors.	5	Double lawn swings.
5	Steps.	1	Frame for ammonia tank.
1	Outside stairway with landing.	1	Barrel stand.
6	Sets of shelving.	1	Hot water tank for ice works.
4	Lattice work tops to closets.	1	Cabinet case with shelving.
6	Lattice doors.		Mosquito net frames.
15	Clothes racks.	100	Cabinet for books, Supt's. office.
4	Step ladders.	1	Tree frames.
2	Boxes for irons.	180	Centres for brick work.
600	Headboards.	3	Wagon frames.
1	Work bench.	3	Water troughs.
12	Voucher boxes.	9	Feed troughs.
4	Wire guards.	2	Coupling poles.
8	Medicine cases.	6	Dump cart bodies.
1	Crutch.	2	Pair wagon hounds.
2	Door frames.	1	Coffins.
2	Platforms.	305	Boxes for shipping coffins.
1050	Turned bureau knobs.	59	Case, with shelving.
3	Well curbs.	1	Filter stand.
14	1-2 Squares of shingling.	1	Case and table for gas stove.
19	Panels of picket fence.	1	Cabinet for records.
8	Panels of close fence.	1	Cupboard.
6	Sink tables.	19	Four-leaved screens for infirmiary.
42	Hoe handles.	1	Door frame.
5	Wagon crates.		
9	Plow beams.		
4	Plow stocks.		
5	Double trees.		
3	Wagon tongues.		
10	Single trees.		

## MATRON'S REPORT.

Georgia State Sanitarium,

September, 1st, 1901.

Dr. T. O. Powell, Superintendent.

Permit me to submit the enclosed as my report for the year ending September 1st, 1901. I would add that repairing has been done for the institution, and all scraps and remnants have been put to a good use, and have been properly accounted for through the Storekeeper's office.

All of which is respectfully submitted,

MRS. J. M. DARNELL, Matron.

## REPORT OF CHAPLAIN.

Georgia State Sanitarium,

September 1st, 1901.

Dr. T. O. Powell, Superintendent.

Sir: I herewith submit the report of the work of the Chaplain for the current year.

All deceased patients who were not carried home have been buried with the usual funeral ceremonies.

Religious services for the inmates of the institution have been regularly held twice a week, Sunday and Thursday afternoon. The music has been under the efficient direction of Mrs. Julia West. The attendance upon the services has been large, the attention marked and the behaviour excellent.

With thanks for many courtesies, both official and personal, from you, I am,

Respectfully yours,

D. W. BRANNEN,  
Chaplain.

## REPORT OF LIBRARIAN.

Georgia State Sanitarium,

September 1st, 1901.

Dr. T. O. Powell, Superintendent.

Dear Sir: Below you will please find my report for the year ending September 1st, 1901:

Number of volumes received to Sept. 1st, 1901 . . . . .	11,266
Mrs. S. A. Young . . . . .	1
H. E. Roberts . . . . .	1
Mrs. D. Lockhart . . . . .	5
Hon. C. L. Bartlett . . . . .	3
Miss J. Trippe . . . . .	5
